The municipality of Ravenna organized some labs for children and adults, taking into consideration different types of disabilities in order to guarantee wide participation and give everyone the opportunity to enjoy the cultural heritage.

Art Museum designed specific itineraries consisting of a guided tour on display followed by a specially designed educational lab.

During the lab experience, participants create a tactile design using simple materials (sandpaper, fabrics, corrugated cardboard, etc.) to express themselves through the artistic experience in an original and accessible way for everyone.

This method, which does not require technical knowledge or specific skills, allows participants, with or without disabilities, to easily overcome the fear of 'not knowing how to make art' by promoting sharing and communication between participants and at the same time stimulating new sensory skills.

Municipality of Ravenna organized 7 labs:
