According to the answers from the questionnaire, 10 people answer on above mentioned questions. 3 people have physical disability, 4 people have psychological and organic disorders, 2 people have chronic illness and 1 of them have hearing impairment.

The chart above shows that 5 respondents consider that sport **quite** contributes to better social interaction and better leisure time, 2 of them consider that sport **partially** contributes to better social interaction and better leisure time, 2 of them answered that sport **at all** contributes to better social interaction and better leisure time and only 1 of them answered that sport **not really** contributes to better social interaction and better leisure time. According to the answers, the sport has a positive impact on social interaction and leisure time.

8 of 10 people are **partially** satisfied with the offer on the sport events for people with disabilities while 2 are **dissatisfied**.

According to the answers, **Inadequate infrastructure** and **Lack of appropriate sport facilities** are the main problems on the sport events for people with disabilities.

The chart below shows how participation in sport events affects the life of people with disabilities.

Participation in sport **moderately** even **quite** contributes to increasment of social interaction with others, helps to release negative energy, forgot about disability etc.

When organizing sports events, most respondents considered **it is not** enough to mention that they are adapted for people with disabilities and also, organization of sports events **don't have** enough media space for people with disabilities.

As suggestions for improving the organization of sport events for people with disabilities, respondents cited more diverse events for people with disabilities, inclusion of people with disabilities in the organization of sport events, and monitoring the interests of persons with disabilities in the field of sport.
