10 people from Association of people with disabilities answer on above mentioned questions. 4 people have physical disability, 4 people have chronic illness and 2 of them have hearing impairment.

2 of those people answered that sport **quite** contributes to better social interaction and better leisure time, 6 of them answered that sport **partially** contributes to better social interaction and better leisure time and 2 of them answered that sport **not really** contributes to better social interaction and better leisure time. It' is obvious that most of them like sports and it contributes to better social interaction and better leisure time.

Most of them are **dissatisfied** with the offer of the sport events for people with disabilities in Zadar County.

For the main problems on the sport events for people with disabilities most of them answered **Inadequate infrastructure** and **Lack of appropriate sport facilities** in Zadar County.

For the fifth question here is the chart.

In the chart it is obvious that sport **moderately** even **quite** contributes to increasing in social interaction with others, helps to release negative energy, forgot about disability and with association with other sport colleagues.

When organizing sports events **it is not** suffices to emphasize that they are adapted for people with disabilities.

Organization of sports events **don't have** sufficient media space for people with disabilities.

Suggestions of improving the organisation of the sport events for people with disabilities is that organizers and public authorities communicate more with people with disabilities.
