Zero Waste Blue

Venicemarathon runs towards the goal of sustainability. After obtaining, in 2015, the ISO20121 certification for the management of sustainable events issued by Tuv Rheinland (first and only running event in Italy), last year Venicemarathon was chosen by Veneto Region as a "pilot event" for the new project of environmental and territorial protection "Zero Waste Blue sport events for territorial development" funded with the Italy Croatia VA Program, and this year the marathon of next 27th October will be a "sustainability model".

The aim of the project is to **reduce the environmental impact**, reduce CO2, increase social, cultural and economic benefits and classify the sustainability
