

PROJECT NAME

DORY | Capitalization actions for aDriatic marine enviroNment pRotection and ecosYstem based management

DESCRIPTION

The project DORY, capitalizing the results of the IPA Adriatic ECOSEA project, intends to promote the adoption of common management models for supporting sustainable fisheries and development of alternative spatial management measures. The pilot activities will test the innovative solutions for reducing the negative aquaculture ecological impact of the economic activities and to, on the other hand, enhance the biodiversity of fish habitats.

MAIN OUTCOMES

Guidelines for the implementation of sustainable fishing management model
MSP tool (DISPLACE) for integrated management of the sea
Recommendation for policy makers
Pilot actions to enhance nursery areas and reduce aquaculture impact
2 Cross-Border Know-How Exchanges
2 Learning Labs training events for MPAs managers and technicians
1 Technical event for Policy Makers

TARGET GROUPS

Local, regional and national public authorities
Protected areas/ natural heritage management bodies
Regional and local development agencies
Associations
NGOs
Universities and research institutes

TOTAL BUDGET

934.405 €

DURATION

1.01.2018 - 30.06.2019
