## 1 QUESTIONNAIRE (ENGLISH)

### QUESTIONNAIRE ON THE STATE OF IMPLEMENTATION OF THE FISHING FOR LITTER SCHEME IN THE PORTS OF THE ADRIATIC

ML-REPAIR Project

(REducing and Preventing, an integrated Approach to Marine Litter Management in the Adriatic Sea)

Application ID No. 10042541

**With Fishing For Litter we mean those initiatives involving the fishermen in the cleaning of the sea, giving them the opportunity to freely bring to the ground and dispose of the waste that they accidentally collect in the nets during normal fishing activities.**

The objective of the present survey is to assess **the implementation status of the Fishing For Litter** in the main Adriatic ports both in Italy and in Croatia, collecting experiences, difficulties encountered and solutions adopted at the local level through interviews addressed to representatives of the local, national and port authorities.

The result will be the creation of a "Map of the State of implementation of the Fishing For Litter scheme" (FFLISM) in the Adriatic Sea that will contain, for each port, all the information related to Fishing For Litter and will represent a tool for policy-makers and administrators interested in developing the scheme.

Thank you for the time and effort that you will spend in filling out this questionnaire.

**If your institution/organization has information for more than port, please fill a single questionnaire for each port.**
