STREAM
Strategic development of flood management

A STREAM OF SOLUTIONS TO COPE WITH FLOODING RISKS

PROJECT DURATION
04/2020 - 12/2022

ERDF
7.999.909,13

TOTAL BUDGET
9.411.657,83

In the last decades, the flooding frequency has increased along the Adriatic coasts because of climate change. In order to protect communities and minimize losses, STREAM aims to develop joint risk monitoring tools and early warning procedures with a cross-border approach.

Conclusion

The production STREAM posters proved to be highly valuable for the project for several reasons. Firstly, the surplus in the number of posters produced (149) compared to the original plan (32) demonstrated an increased commitment to raising awareness and disseminating important information. These posters served as effective visual aids to convey the project's objectives and outcomes, and the higher quantity ensured broader coverage and visibility. Additionally, the surplus of posters allowed for flexibility in distribution and accommodated unanticipated opportunities for outreach, further enhancing the project's ability to achieve its awareness-raising goals.
