

STREAM website

Final version June 2023
Deliverable number 2.3.1.

Project Acronym	STREAM
Project ID Number	10249186
Project Title	Strategic Development of Flood Management
Priority Axis	2 – Safety and Resilience
Specific objective	2.2 – Increase the safety of the Programme area from natural and man-made disaster
Work Package	Number 2
Work Package Title	Communication Activities
Activity Number	2.3.
Activity Title	Digital Activities
Partner in Charge	PP14 – City of Venice
Partners involved	All Partners
Status	Final
Distribution	Public

[Introduction](#)

STREAM website is a project dedicated section on the IT-HR web platform, which provides information about the project, its aims and activities, as well as already organized events or events that are planned. Information is regularly updated and available to the public.

[STREAM website](https://programming14-20.italy-croatia.eu/web/stream)

The STREAM project website can be accessed at the following link - <https://programming14-20.italy-croatia.eu/web/stream>. The website is actually a section dedicated to project STREAM on the IT-HR web platform.

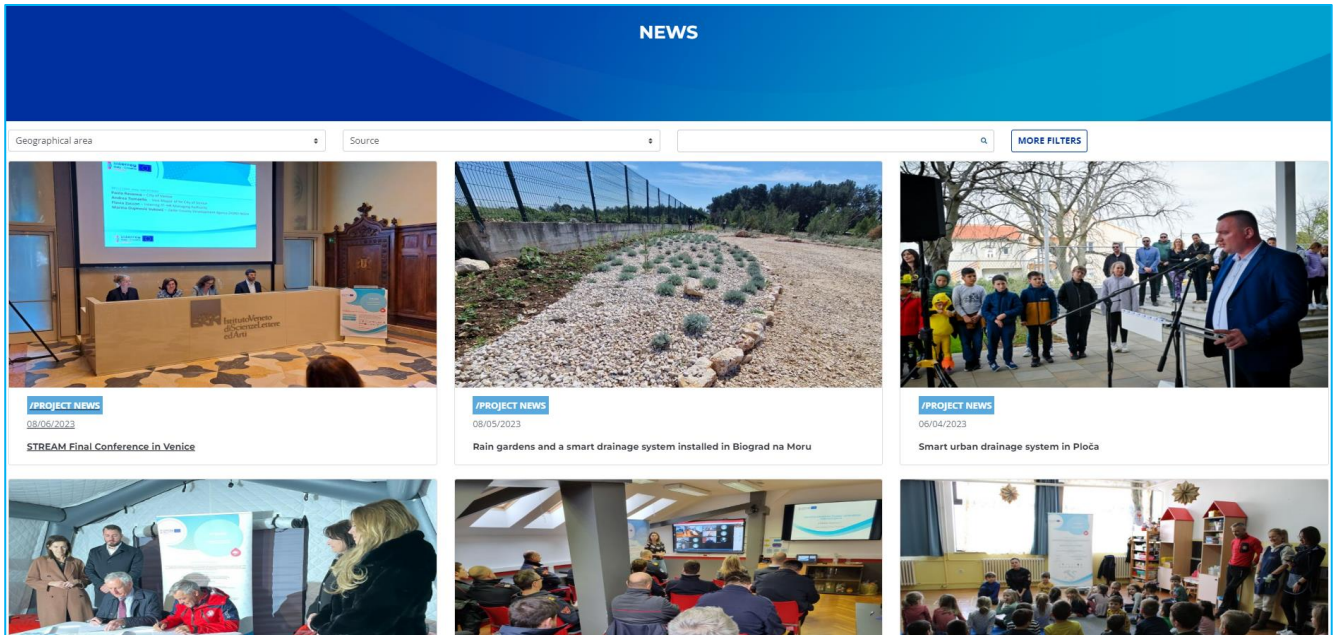

The home page of the website, where users can navigate between the offered sections.

The website contains different sections, like *About the Project*, *News*, *Events*, *Docs&Tools*, *Multimedia*, *Contacts* and *Go to the Programme*. These sections are filled with information about the project goals and achieved outcomes, as well as media from the organized events. The website also contains a list of all the involved partners in the project and their contacts.

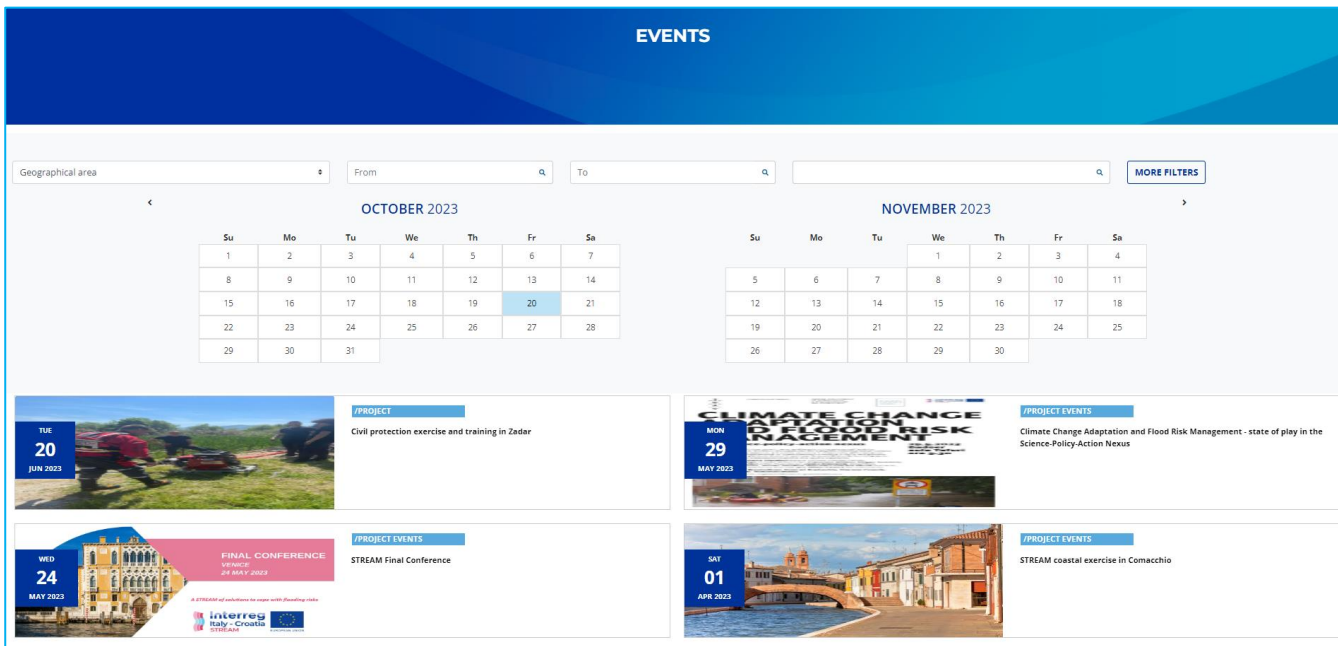

<p>START DATE 01.04.2020</p> <hr/> <p>END DATE 30.06.2023</p> <hr/> <p>TOTAL BUDGET € 9.411.657,83</p>	<p>SPECIFIC OBJECTIVE</p> <p>The project will contribute to increase knowledge about floods in the areas involved. Local authorities and emergency services will improve their flood risk management, while people will learn how to behave in case of flood hazards. This will help to reduce the human and socio-economic losses caused by floodings.</p> <hr/> <p>LEAD PARTNER STREAM - ZADAR COUNTY DEVELOPMENT AGENCY ZADRA NOVA</p>	<p>TARGET GROUPS</p> <ul style="list-style-type: none"> • General public • Local, regional and national public authorities and related entities • Emergency services and coast guard centres
---	---	--

In the last decades flooding frequency has increased along the Adriatic coasts and is expected to further do so in the next 50 to 100 years. This is a tangible effect of climate change that local communities experience. STREAM thus aims to reduce human and socio-economic losses in case of flood hazards, by improving flood risk management of local authorities and emergency services with a cross-border approach. Partners will work together to develop risk monitoring tools and early warning procedures, with a combined bottom-up and top-down approach. Data sharing, exchange of practices and capacity building schemes will bring additional know-know to stakeholders in the project area.

Particularly, STREAM will set up a flood cadastre, flood risk maps, and a flood risk management plan. Another key element will be reaching the largest possible audience. To do so authorities will organize workshops, info-days and events, to improve the citizen's readiness and rescue operations in case of floodings. In fact raising their awareness in order to adopt correct behaviours is essential to minimize losses. Once they are achieved, STREAM results can be transferred and put into practice in other coastal regions facing similar problems.

Conclusion

The creation of a project dedicated section on the IT-HR platform was an important component of the overall project's success. This website/platform serves as a central hub for project-related information, offering details about project aims, activities, and past and upcoming events. Its importance lies in its role as a real-time information source, ensuring that stakeholders, partners, and the wider public can access up-to-date information on the project's progress and activities. This transparent and easily accessible channel not only enhances communication but also fosters greater engagement and awareness, ultimately supporting the project's overarching goals of raising awareness about flood risk management and providing valuable resources for stakeholders.
