A.2.5. Public events
D.2.5.4. Final conference follow-up Report

Venice 24 May 2023

AGENDA

PALAZZO CAVALLI FRANCHETTI – SAN MARCO 2847 VENICE

streamed on the youtube at: <https://youtube.com/live/jyfEacD6MY0>

8.30 - 9.00	REGISTRATION
9.00 – 9.30	WELCOME AND GREETINGS
	<p>Paola Ravenna – City of Venice Andrea Tomaello - Vice Mayor of he City of Venice Flavia Zuccon – Interreg IT- HR Managing Authority Marina Dujmović Vuković – Zadar County Development Agency ZADRA NOVA</p>
9.30 – 10.00	SESSION I – STREAM PROJECT AND THE INTERREG IT_HR PROGRAMME
	<p>Silvia Comiati – Interreg IT- HR Joint Secretariat <i>The Interreg IT-HR Programme: Supporting cross border cooperation on Climate change Resilience – results from the 2014-2020 period and future perspectives</i></p> <p>Mia Perica – ZADRA NOVA <i>STREAM project activities and achievements</i></p>
10.00 – 10.45	SESSION II – BUILDING SHARED KNOWLEDGE ON FLOODS
	<p>Giorgio Fontolan – University of Trieste <i>Coastal risk management in the Veneto region coast</i></p> <p>Vlatko Roland - University of Zadar <i>Flood Risk Management Plan in Croatia</i></p> <p>Giacomo Cazzola – IUAV University <i>Integrating and updating flood risk management planning at the municipal level</i></p>
10.45 - 11.15	SESSION III – INSTRUMENTS FOR MONITORING AND FORECASTING FLOODS IN ITALY AND CROATIA
	<p>Christian Ferrarin - CNR- ISMAR <i>One Mutimodel Forecasting system</i></p> <p>Nino Krvavica - University of Zadar <i>Probabilistic Model for Pluvial floods</i></p>
Coffee break	
11.40 – 12.10	SESSION IV – SEA CONDITION FORECAST SYSTEM IN VENICE
	<p>Marco Favaro – City of Venice – Tide Forecast Centre; Francesco Barbariol CNR- ISMAR: <i>A network of wave buoys in the sea facing Venice and the sea condition forecasting tools</i></p> <p>Amedeo Fadini – City of Venice, Tide Forecast Centre – external consultant <i>Dynamic maps of flooding in the urban soil of Venice and dynamic maps of</i></p>

	<i>forecasted sea storms on Veneto region coast</i>
12.10 – 13.15	RESULTS FROM THE LOCAL PILOT PROJECTS
	Enrica Verducci - Marche Pilot Project
	Luis Germano Biolchi - Emilia Romagna Coast – Po Delta Pilot site
	Kristina Ivanov - Zadra Nova Smart Urban Drainage System
	Valeria Intini e Ivan Federico – Puglia Pilot Project - ASSET e CMCC
	ADSU Teramo - Pilot project
	Igor Kukić - City of Poreč - Parenzo Pilot Project
	Mato Tomljanović – Dubrovnik County Pilot project
	Marina Rukavina - Development Agency of Lika-Senj County – LIRA Pilot Project
	Ante Vukasović - Split - Dalmatia County – Pilot Project
	QUESTIONS & ANSWERS
13.15	CONCLUSIONS
13.30	LUNCH

The Final Conference of project STREAM was organized by the City of Venice, on May 24th 2023. The purpose of the final conference was to summarize and discuss all the results, activities, and achievements of project STREAM and its potential contribution in the area of future flood management. In particular, the conference wanted to show how the project contributed to improve the technologies of the early warning and monitoring systems and to enhance the capacity of the emergency services to promptly react to flood events.

It was held on Tuesday, May 24, in Palazzo Cavalli Franchetti – San Marco 2847, Venice and was attend by 80 participants. Among them representatives of the project partners’ institutions, technicians, meteorologists, researchers, civil protection officers and the general public. It was also live streamead on youTube at <https://youtube.com/live/jyfEacD6MY0>

Participants were welcomed by the Vice Mayor of the City of Venice, Andrea Tomaello and the Director of ZADRA NOVA, Marina Dujmović Vuković, who both highlighted the relevance of the project for the involved territories.

After the introductory session, Silvia Comiati from the Interreg IT- HR Joint Secretariat gave a presentation on the topic of “The Interreg IT-HR Programme: Supporting cross border cooperation

on Climate change Resilience – results from the 2014-2020 period and future perspectives”. This presentation was followed by a presentation of project results and achievements by Mia Perica, from LP ZADRA NOVA. The sessions that followed discussed activities that were part of the official project work packages, namely, Creating Flood Knowledge Documents, Development of Innovative Technologies and Systems of Flood Forecasting and Early Warning System, and finally, the presentation of activities and results related to the nine Pilot sites of project STREAM in both Italy and Croatia.

The final conference of the STREAM project represented a vital opportunity to present the results obtained through the specific project activities and discuss the future challenges related to coastal risk management. With the increasing frequency of flooding along the Adriatic coasts due to climate change, it becomes crucial to adopt long-term preventive measures. The conference underlined the importance of collaborating between coastal cities to share experiences and knowledge, in order to ensure the safety of citizens and successfully face future challenges affecting the Adriatic Sea.

The event gained local media attention.

A journalistic news report was broadcasted on the regional TV news Rai under the title: Stream" project, Italy and Croatia together to manage coastal flooding:
