

Carried out five (5) training seminars on how to use new technology

Final Version of June/2023

Deliverable number 4.2.4.

Project Acronym	STREAM
Project ID Number	10249186
Project Title	Strategic Development of Flood Management
Priority Axis	2 - Safety and Resilience
Specific objective	2.2 - Increase the safety of the Programme area from natural and man-made disaster
Work Package Number	4
Work Package Title	Development of innovative technologies and systems of flood forecasting and early warning system
Activity Number	4.2.
Activity Title	Response system improvement - communication technologies improvement
Partner in Charge	PP12
Status	Final
Distribution	Public

3. Conclusion

On Thursday, February 9, a central software solution was presented that enables the connection and control of the entire system of the Civil Protection of Karlovac County, primarily keeping in mind the operational forces of the CZ of Karlovac County, the participants, their control and lifting in case of need. The education is part of the Intervention Management System, financed through the Interreg program STREAM, in cooperation with the company Proaxis, and supported by the Deputy County Commissioner and Chief of Staff of CZ Karlovac County, Vesna Hajsan-Dolinar, praising them for their hard work and contribution.

The training included the following units: presentation of work within the Microsoft Domain Controller system, work with Viewsonic interactive screens, Avaya SPACES POWER video conference system, Avaya Huddle camera video/audio conference cameras, speakers/microphones Avaya Conference Phone B109 and B129, communication console management, and demonstration of the display of data from the UVI Screen system. It included a networked video conference of three different locations: Karlovac, Ogulin and Slunj, using presentations of intervention situations in real time.
