1. Introduction

One Dissemination and transferability event held in Karlovac County, D 5.9.5., was carried out as part of the final exercise, June 16, 2023. It was held in hall, Karlovac County, A. Vraniczanya 2, 47000 Karlovac. Operational forces of the civil protection system of the Karlovac County participated. The contractor is the voluntary fire company Karlovac, a simple procurement was carried out and the contract was signed on May 29, 2023. Performed on June 16, 2023.

"STREAM FLOOD 2023" is a layered exercise that takes place at several levels of management. Primarily, it is an exercise of regional and local self-government units in which, in addition to operational forces, legal entities and state administration bodies interested in the protection and rescue of people, animals, property and the environment participate.

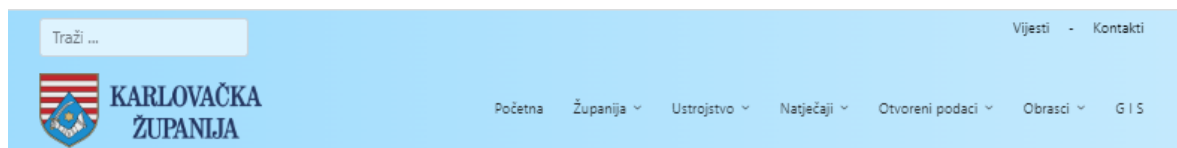

In order to achieve the set goals, the exercise was developed as a practical and field exercise. In addition to staff management, leadership and command, operational tasks are practiced during the activation of the Karlovac County Action Plan in the event of a flood. The basic setup of the exercise is that all operational forces in the exercise operate and move from their headquarters in real time. This type of elaboration leads to real indicators of the efficiency, operability and flexibility of the civil protection system of Karlovac County.

A media conference was also held as part of the project. The news was published on the official website of the Karlovac County.

The holder of the exercise is Karlovac County, i.e. the Civil Protection Headquarters of Karlovac County, and the exercise is conducted and organized by DVD Karlovac, selected through the "STREAM" project in cooperation with other holders and executors in accordance with the Action Plan of Civil Protection of Karlovac County in the event of a flood. For the preparation and organization of the exercise, a management group was appointed, consisting of members of the Karlovac County Headquarters and representatives of the operational forces. The participants of the training program for fire commanders for leading and commanding fire interventions at the VIZ-III level within the framework of practical exercises and application of acquired knowledge join the management group.

Održana završna vježba projekta STREAM

16 Lipanj 2023

U sklopu projekta STREAM u Karlovačkoj županiji danas se održala završna vježba POPLAVA - 2023.

Sudjelovale su operativne snage CZ Karlovačke županije, lokalni stožeri civilne zaštite grada Ogulina, Slunja i Duge Rese, županica Martina Furdek-Hajdin i zamjenica i načelnica Stožera CZ KŽ Vesna Hajsan-Dolinar te voditeljica projekta STREAM Valentina Resovac.

Početak vježbe simbolizirao je upućen poziv o ugrozi prema Centru 112. Simulacija se odnosila na vodostaje rijeka koji zahtijevaju proglašenje izvanrednog stanja, a tom slučaju župan, gradonačelnici i načelnici postaju zapovjednici Stožera civilne zaštite.

„Samom vježbom smo pokazali ozbiljnost i spremnost svih naših voditelja, ne samo sudionika u vježbi već i odgovornih osoba na svim razinama. Ovim današnjim aktivnostima želimo unaprijediti sustav, ažurirati podatke koji se nalaze u planovima djelovanja. „ – kazao je županijski vatrogasni zapovjednik Goran Franković

Projekt „STREAM“ financira se iz Programa prekogranične suradnje INTERREG V-A Italija-Hrvatska 2014.-2020., a ukupno je vrijedan 9.411.657,83 €.

Zamjenica županice i načelnica stožera CZ Karlovačke županije Vesna Hajsan-Dolinar naglasila je važnost projekta STREAM: *„Karlovačka županija je partner u tom projektu i na njezinom području vrijednost iznosi 649.910 €, od čega su bespovratna sredstva EU 552.423,50 € (85%), a vlastita sredstva Karlovačke županije iznose 97.486,50 € (15%). Cilj ovog projekta je uvođenjem novih tehnologija smanjiti rizike i štetne utjecaje od poplava na ugroženom području te pravovremeno obavješćavanje stanovništva o nadolazećoj opasnosti.“*

Sama vježba počela se pripremati još u ožujku ove godine, a samo nekoliko mjeseci kasnije prava ugroza zaprijetila je Karlovačkoj županiji. I tada, sve žurne službe pokazale su svoju spremnost na krizne situacije, a ova vježba dodatno će educirati ljude za vođenje i zapovijedanje u takvim situacijama, kako bi se što bolje pomoglo stanovništvu i spriječila veće štete.

Jedan od elemenata STREAM projekta je i uvezivanje sirenskog sustava za uzbunjivanje, inače nove aplikacije koje posjeduje Ravnateljstvo civilne zaštite, a zadatak mu je da osim pravovremenog alarmiranja na nadolazeću opasnost, obavijesti ljude o točnim smjernicama kako postupiti.

3. Conclusion

The exercise was shown to the public, which was carried out in such a way that everything was "real time", that is, none of the participants of the operational services today until 8 o'clock in the morning knew any information and what was going to be done, but everything was simulated exactly as it would happen in reality. .

In this way, the great seriousness of all managers, participants, and responsible persons at all levels was proven. The activities are intended to improve the system, deduce and update the data contained in the action plans, and he adds that he hopes to learn something new from everything.
