The registration will be closed on “**23 May, 2023**”

Online registration form: <https://forms.gle/7LXnFYHkrUVsMJcG6>

CITTA' DI  
VENEZIA

# STREAM Final Conference

## Agenda

**FINAL CONFERENCE**  
VENICE  
24 MAY 2023

*A STREAM of solutions to cope with flooding risks*

The frequency of floods along the Adriatic coast is increasing year by year and the phenomenon, due to ongoing climate change, is set to grow further in the next 50-100 years.

STREAM is a transnational cooperation project that started 3 years ago with 16 Italian and Croatian partners to develop shared strategies to better manage flood events in the Italian and Croatian coastal areas.

The project, led by the Zadar County Development Agency Zadra Nova, in its 39 months of operation developed flood monitoring tools, innovative forecasting and warning systems, as well as management plans to support risk management and rescue.

Thus, the Final Conference in Venice will be the occasion to show how the project contributed to improve the technologies of the early warning and monitoring systems and to enhance the capacity of the emergency services to promptly react to flood events.

<b>PALAZZO CAVALLI FRANCHETTI – SAN MARCO 2847 VENICE</b>	
8.30 - 9.00	<b>REGISTRATION</b>
9.00 – 9.30	<b>WELCOME AND GREETINGS</b>
