

D.2.3.1 WEBSITE ACTIVITIES REPORT

InnovaMare project

Blue technology - Developing innovative technologies for sustainability of Adriatic Sea

WP2 – Communication activities

Project References

Call for proposal 2019 Strategic – InnovaMare

Project number: 10248782

Work package: WP2 Communication activities

Activity title: A3 Promotional materials and Communication toolkit

Deliverable title: D.2.3.1. Website activities report

Expected date: 30/06/2023

Deliverable description: a report of the performed activities in the project website design, implementation, update and feed.

Partner responsible for the deliverable: ARTI Puglia

Dissemination level: CO - Confidential

Status: Final

Version: V1

Date: 23rd June 2023

INTRODUCTION

Communication is a crucial process embedded into every stage of a project's life cycle. From the project start up, through implementation, until and even after closure, communication plays a key role in its success. In fact, communicating a project also means contributing to the transfer of results and their use by a wider audience.

To maximize the project impact and reach new audiences, it is necessary to adopt a balanced mix of online and offline communication tools, because of the diversity of contents communicated to varied target groups. The website is one of the most useful tools for this purpose: it is the place where users (be they end-users, beneficiaries, stakeholders, policy makers, etc.) can find all kinds of information useful for their purposes.

Website is the primary information and communication channel of an organisation, a company, a public administration, a project and any other entity need a showcase for its activities. Website is efficient in terms of time and human resources, effective, easily updated with the latest information and accessible to those interested.

The website is a source of information not only for project stakeholders (including potential beneficiaries) but also for the wider public. Websites should be regularly updated with news (both programme and project), information on projects and the benefits they bring: they are the first place for many target groups to find information from.

A well designed project website can be a key management tool, capable of raising the profile of the project and improve dissemination of its results to a wide range of stakeholders.

InnovaMare website (<https://programming14-20.italy-croatia.eu/web/innovamare>) was constantly updated with news and information on the project activities, but also with public documents, pictures and videos.

The feed of website with news, events and documents was a common commitment of all partners, that had to provide the Lead Partner - CCE with suitable and proper contents.

This deliverable proposes a report of the performed activities in InnovaMare website in terms of implementation, update and feed. Analytics were not collected as the GA code was requested in date January 14 and 25 and February 23 as well as in June 30, 2021 but has not been implemented since the call center did not provide the correct code for user access and behaviour monitoring of the project webpage.

INNOVAMARE PROJECT WEBSITE

InnovaMare website was designed following the Interreg Italy-Croatia Programme visual identity and website. In fact, in EU financed projects, the practice of building a visual identity common to all projects financed by the same Programme is now widespread. The Interreg Italy-Croatia Programme is no exception: it adopted this new branding orientation consistent with the new brand mark “Interreg” developed and used by all ETC programmes that joined their efforts to create a harmonised visual identity between all of them. This orientation allows on the one hand to increase the awareness of the projects and consequently also of the Programme; on the other hand to avoid the allocation of significant budgets of individual projects for the creation of a specific visual identity.

According to this standing, the general structure of InnovaMare website was created by the Interreg Italy-Croatia Programme; each project has the task of enriching and feeding the website according to their needs. As all the Interreg Italy-Croatia websites, InnovaMare website is structured as follows:

- A home page, with the project overview (key numbers, budget, specific objective, target groups, short description, partnership description); the latest news and events; the library including documents (mainly WP2 deliverables), presentations and public procurement documents; videos and multimedia contents;
- News section, with the complete list of project news
- Events section, with the complete list of project events
- Docs&tools section, which refers to the specific area of the Italy-Croatia Programme website containing all the documents to project implementation, application utilities, application package, etc.

 **INNOVAMARE**
DIVE INTO THE DEPTH OF OPPORTUNITIES

START DATE 01.07.2020 END DATE 31.12.2022 TOTAL BUDGET € 5.555.755,45	SPECIFIC OBJECTIVE Innovamare project will bring cross-border collaboration between science and private sector on a higher level and will increase the competitiveness of SMEs in international networks. Innovamare project aims to enhance collaboration on technology transfer for innovation activities in the field of underwater robotics and sensors.	LEAD PARTNER Innovamare - CROATIAN CHAMBER OF ECONOMY	TARGET GROUPS The project addresses all the stakeholders involved in sustainability of the Adriatic Sea: <ul style="list-style-type: none"> • general public researchers; • local, regional and national public authorities; • regional and local development agencies, chambers of commerce and industry, business associations; • small and medium enterprises; • research, technology transfer institutions, research institutions; • NGOs, associations, investors; • agencies, business incubators, clusters, business parks and networks.
---	---	---	---

The Adriatic Sea is facing major impacts from overfishing and pollution. Solid waste, direct discharge of wastewater and oil pollution are key negative factors for the degradation of coastal and marine ecosystems. Innovamare strategic project will jointly develop and establish an innovation ecosystem model in the area of underwater robotics and sensors for purposes of monitoring and surveillance sector with a mission-oriented on the sustainability of the Adriatic Sea.

Innovamare strategic project will tackle one of the main current challenges: increasing the effectiveness of the innovation activities in the relevant fields of the blue economy.

HOW?

By enhancing the transfer of knowledge within the cooperation area between the enterprises, R&D centers, higher education and the public sector through education and capacity building actions for different stakeholders.

KEY PROJECT NUMBERS

5.6 millions €

PROJECT PARTNER

UNIRI 
UNIVERSITY OF RIJEKA
<https://unirijeka.hr/>

The University of Rijeka was the first Croatian University to set a development strategy. It focuses on excellence, quality assurance, life long learning, active collaboration with the local community & economy and active inclusion into the ERA & EMA. The University of Rijeka has extensive experience in managing EU projects through its Centre for EU projects, with a number of successfully realized international and EU projects in a diversity of EU R&D programmes and funds.

Contact person: Željana Mikočić
 E-mail: zeljana.mikocic@biotech.unirijeka.hr

PROJECT PARTNER

UNIVERSITY OF TRIESTE
<https://www.units.it/>

The University of Trieste (UNITRI) and the Department of Economics, Management, Mathematics and Statistics (DCAMES) have a long tradition in business and innovation related studies and strong record of research in innovation systems, maritime and naval clusters. The DCAMES is fully committed into its research activities on the blue sector and in the valorization of its scientific research through the establishment of stronger links with the business system and other technology transfer activities.

 E-mail: mara.contardo@econ.units.it

PROJECT PARTNER

NATIONAL RESEARCH COUNCIL (CNR)
<http://www.cnr.it/cnr/>

CNR ISMAR has a long recognized experience in marine studies, both in the coastal areas and in the open oceans. Cutting edge research is carried out by combining long and short-term observational and modeling approaches, involving both analytic and numerical tools. CNR-ISMAR carries out cutting-edge research in marine robotics on modelling and identification, cooperative navigation, guidance, control, and design of innovative marine robotics systems.

Contact person: Francesco Falco
 E-mail: francesco.falco@cnr-ismar.cnr.it

PROJECT PARTNER

COMMUNICATION TECHNOLOGY (CT)
<https://www.comnet-tac.com/>

Company has 30 years of experience in scientific instrumentation for the oceanographic research. Extended R&D capabilities in creating complex custom systems integrating multiple sensors with real-time data communication. Company with commercial, import/export, trade experience, and technical/scientific capabilities in the field of Earth Sciences and Oceanography.

Contact person: Chiara Berini
 E-mail: chiara@comnet-tac.com

PROJECT PARTNER

RUBEN BOŠKOVIĆ INSTITUTE
<https://www.rbo.ac.rs/>

The Ruđer Bošković Institute is regarded as Croatia's leading scientific institute in the natural and biomedical sciences as well as marine and environmental research. The RBO is a multidisciplinary institution of scientific departments focused on competitive research in physics, chemistry, biology, medicine and environment. The Division of Marine and Environmental Research (DMER) is organized in 12 laboratories and a marine station observatory, near the city of Šibenik (the largest RBO division).

Contact person: Nenad Čolović
 E-mail: nenad.colovic@rbo.ac.rs

PROJECT PARTNER

ŠIBENIK-KNIN COUNTY
<http://www.štibensko-kninska-zupanija.hr/>

Šibenik-Knin County is a regional self-government whose area represents a natural, historical, traffic, economic, social and self-governing whole. It carries out affairs of regional importance, in particular the legal affairs relating to education, health, spatial and urban planning, economic development, traffic and transport infrastructure, environment protection, planning and development of the network of educational, health, cultural and social institutions, location permits and other.

Contact person: Štefica Matetić
 E-mail: steftica.matevic@skz.hr

PROJECT PARTNER

GEO-MAR LTD
<https://geomar.hr/>

GOMar is a Croatian survey company specializing in hydrography - high resolution seabed mapping, ROV inspection and technical support to companies operating in aquatic environments. Most of work is related to the Croatian coast and inland water and the reference markers include submarine installations, port authorities, scientific research, marine technologies and other related businesses.

Contact person: Matjaž Čurić
 E-mail: matjaz@geomar.hr

PROJECT PARTNER

REGIONAL AGENCY FOR TECHNOLOGY AND INNOVATION
<https://www.arti.puglia.it/en/puglia-region-agency-for-technology-and-innovation>

Established in 2004, the strategic Agency for Technology and Innovation of Apulia supports the regional government in designing and managing economic development, innovation, education, training and job policies, in coherence with the regional smart specialization strategy and the emerging trends at national and international level. ARTI's vision is to be the regional government agency of the frontier, targeting the themes, sectors and technologies of modernity.

Contact person: Francesca Tondi
 E-mail: tondi@arti.puglia.it

PROJECT PARTNER

MARITIME TECHNOLOGY CLUSTER (PTV)
<https://www.marefig.it/>

marefig is a non profit public-private consortium of maritime stakeholders with a membership including big enterprises, SMEs, universities, research centres, scientific parks and incubators, education organisations and aggregation players. The mission is to link industries and scientific institutions within a network of organized relationships, finalized to develop Research, Innovation and Education projects with the aim to enhance competitiveness of the industrial basis of the PTV region.

Contact person: Alessia Basselli
 E-mail: comunicazione@marefig.it

PROJECT PARTNER

NATIONAL INSTITUTE OF OCEANOGRAPHY AND EXPERIMENTAL GEOPHYSICS - OGS
<https://www.ogs.it/en/content/institute>

OGS is an internationally oriented public research institution, which promotes and carries out basic and applied research in the fields of Oceanography, Geophysics and Marine Geology. The OGS expand and carries out its research with a multidisciplinary approach and it is articulated into 7 groups, reflecting the expertise of the staff, embracing physical oceanography, marine biology & biogeochemistry, system modelling, tech. developments and integration.

Contact person: Cirio Consoli
 E-mail: cirio.consoli@ogs.it

PROJECT PARTNER

FACULTY OF ELECTRICAL ENGINEERING AND COMPUTING
<https://www.fer.hr/en/>

Faculty of Electrical Engineering and Computing (FER) is part of University of Zagreb - the largest and oldest Croatian university. The Laboratory for Underwater Systems and Technologies (LUST) is a research group within the FER and serves as the focal point for applied research and development activities in unmanned marine systems and technology for end-users. Its vision is to advance in multidisciplinary engineering research.

Source: InnovaMare website homepage

InnovaMare website was constantly updated with news and information related to the project, but also with public documents, pictures and videos.

Throughout the project lifetime, the website was fed and updated with a total of **80 different contents**. In particular, 33 news, 20 events, 10 documents in the library, 3 videos and 14 pictures were published. They were all related to project activities, i.e. events, train the trainers programme, Swamp and Korkyra demonstrations, meetings, etc.

INNOVAMARE ON THE PROJECT PARTNERS WEBSITES

In addition to the official project website, many partners were actively engaged in disseminating the results and activities carried out within the project to their local audience, thus contributing to the visibility and the knowledge of the project impact at local level.

CONCLUSIONS

As pointed out in the Introduction of this deliverable, websites are the primary source of information for users. Having an updated web site is therefore extremely important. Having an updated website is therefore extremely important. The Lead Partner, together with all the consortium members, have carried out this task throughout the project lifetime.

Unfortunately, there was no possibility of collecting the analytics of the website, as the GA code was requested in date January 14 and 25 and February 23 as well as in June 30, 2021 but has not been implemented since the call center did not provide the correct code for user access and behaviour monitoring of the project webpage.

In order to maximize the visibility and the knowledge of the project impact at local level, almost all partners have contributed to spread the information about InnovaMare strategic project activities and results through their project website.
