# 1. TERMS OF REFERENCES FROM APPICATION FORM

# ACT. 5.2 Restoration actions supporting endangered species

Activity number	2		
Title	Restoration actions supporting endangered species		
Description	Soft restoration tests and actions will be implemented by relevant PPs. In P3 the extension of the MPA and soft restoration related to coastal ecosystem will be considered. In P2 the feasibility of restoring Spartina maritima vegetation will be exploited. In P7 and P10 UNIMOL plans local restoration actions about coastal and wet habitats and erosion in collaboration with local authorities. IRB will develop restoration actions for identified threats to and losses of habitats and endangered species in P8. IOF will propose measures for prevention of further degradation of the studied ecosystem in P4 and P6. Sea and Karst proposes measures for restoration of the studied ecosystem in P9. This activity will include stakeholders engagement and capacity building for the implementation of restoration actions.		
Start date	01/10/2020		
End date	31/12/2022		
Activity deliverables	D5.2.1 [PP in charge: UNIBO; delivery: M36] Report on implemented restoration test and soft actions supporting endangered species, with the contribution of all PPs [PP in charge: Delta2000; delivery: M36] Organization of at least 2 workshops (also virtual) for each Pilot for stakeholders engagement (at least 15 participants for each workshop)and capacity building on restoration actions supporting endangered species. Workshops will be organized by Delta2000 in collaboration with the PP leading and participating to each Pilot		
Activity budget	€ 230.835,00		

# ACT. 5.3 Integrated costal/marine management system

Activity number	3
Title	Integrated coastal/marine management systems
Description	For each Pilot, relevant partners develop best practice of LSI/ICZM/MSP and water/coastal/marine integrated management plans. UNIBO (with ARPAE) optimizes management activities and tests them in P2. Active involving of local stakeholders in a Local Marine Forum – LMF is performed in P2. IUAV upgrades and tests indicators on land see interaction and MSP and applies them in several pilots (e.g. P1, P5). ARPA FVG/IRB define guidelines for maintaining the monitoring efficiency on P1 and P8. City of Nin/IOF develop an integrated management system for P6. Regione Puglia/UniSalento/CMCC produce guidelines for protection and management of P3. UNIMOL develops the integrated management plan for P7. UniMolise develops coastal-marine integrated management plan for P10 with Authority Management of MPA Torre Cerrano. Sea and Karst proposes measures for achieving sustainability in ICZM of P9. Regione Marche proposes an integrated management system for P11.
Start date	01/12/2020
End date	31/12/2022

Activity deliverables	D.5.3.1 [PP in charge: IUAV; delivery: M36] Report on Integrated coastal/marine management systems implemented in relevant Pilots by involved partners, with the contribution of all PPs D.5.3.2 [PP in charge: Delta2000; delivery: M36] Organization of at least 2 workshops (also virtual) for each Pilot for stakeholders engagement (at least 15 for each workshop) and capacity building on integrated coastal/marine management systems.
Activity budget	€ 434.558,00

# 2. General aim

The aim is to involve the stakeholders through workshops for the following aims:

- (act. 5.2) to enhance stakeholders engagement and capacity building for the implementation soft restoration tests and actions implemented
- (Act. 5.3.) to enhance stakeholders engagement and capacity building for the development of best practice in LSI/ICZM/MSP and water/coastal/marine integrated management plans

Project partners have to realize n. 2 workshops for sites involved, with at least n.15 participants, also on line.

# 3. GENERAL GUIDELINES FOR WORKSHOP

# 3.1 EVENTS ORGANIZATION

Some suggested steps -before the event:

- Participants should be recruited from various groups of stakeholders: workshops have to be customized and defined taking in consideration the target groups identified and activities realized;
- definition of an invitation list: type of subjects, bodies involved and their role;
- definition of a programme/agenda and a date for the workshop (preferably send a "save the date" first): please remember to use always project and programme identity / logos;
- Considering the type of event, it is suggested/it could be needed the presence of a facilitator / moderator;
- The connections of events with the pilot sites involved in CASCADE project and in the activities realized or planning in the sites (As in the table above, cfr. Act. 5.2 and /or Act. 5.3) is pivotal: the workshops have to be organized taking in mind the aim.

Some suggested steps -during the workshop:

- 1<sup>st</sup> workshop: It should include the presentation of the CASCADE project in the beginning;
- Take in mind guidelines for the content and themes of event;
- Take note and take pictures/video to prepare the minutes / follow up report of each workshop;
- Workshop should give floor to the participants to give feedback: during the workshop the inputs, participatory process, involving of participants is more important to better define and finalizing the activities.

# 3.2 ON-LINE EVENTS – MINIMUM REQUIREMENTS

In relation to the current period of pandemic emergency situation related to the Covid-19 and the impossibility of the projects to implement the traditional off-line events in presence both on local, national and cross-border level, at the Programme level are set the following **minimum communication requirements** for the organization of the **on-line workshop.** 

Here following some suggestions that you could consider related to the dimension of the workshop.

**As minimum,** in case of workshop on line, the compulsory minimum requirement is

- <u>Picture of participants with stamp screen or using phone/camera, with evidence of date and hour and list of participants</u>

## Other suggestions, not compulsory:

- If possible, record the workshop on line, with the consent of all participants, according to the law;
- Engagement of the well-identified and motivated target groups by means of activities carried out on social media (i.e advertising segmented per users groups);
- Adequate online promotion and information about the event (pre-event and postevent);
- Assure the presence of the moderator of the event and of the coordinator of the chat box (regia);

- Proactive communication during the event by means of i.e. live-twitting (using the pre-event defined hashtag and aimed at creating the trending topic on Twitter and other social);
- Adequate graphic composition for the layouts of the background scenes (with project(s) logos and/or coordinated visual identity of the specific event) of speakers going live in interviews in hybrid modality – speaker(s) and moderator onsite and the audience online in streaming;
- Plan the moments for the online interaction with stakeholders by means of interactive features and/or by foreseeing and launching an interactive and creative quiz of knowledge verification. Example of tools could be Miro board, Mentimer, etc.
- Video-conference set-up should be planned and carried out using the professional communication platforms with availability of features for the interaction with participants (raising hand, chatbox etc.)

# 3.3 FOLLOW-UP REPORT OF WORKSHOPS

As you know, for each event including the workshops you have to use the "Event follow up template" provided by LP available in the Project repository in the Section WP 2 Communication – Event report.

Following the template, you have to provide the information required as the typology of the audience present, in case of both online and offline events, and setting up the description of each of the speakers' presentations and main conclusions of the discussion that took place. Also some relevant photos should be enclosed for each speaker and, in case of online event, several screenshots of main speakers and audience should be enclosed to the follow up report.

Qualify your audience in numbers (nr. of participants) and by segmenting the typology of the stakeholders (i.e. 5 business supporting organizations representatives, 20 regional public authority representatives, 10 national public authority rep., 10 students etc.).

In the specific framework of the workshops foreseen in the WP 5 we suggest to considering as minimum element for the section of **Speakers speeches, brief summary and conclusion** the following elements (or include these elements in the minutes of the event if you prefer):

- 1. Speakers speeches (name, profession, role / experience, competence) including moderator if is present (name, profession, role / experience, competence)
- 2. **Information, knowledge and dissemination:** Contents and themes presented and discussed with indication of speakers (name surname if possible) about:
- Presentation about the activities on topic of restoration actions supporting endangered species for act. D.5.2.1;
- Presentation about the activities on topic of integrated coastal/marine management systems for the D.5.3.

- 3. **Inputs and suggestions by the stakeholders and participants,** with a brief explanation about the inputs of stakeholders involved, their proposals, etc.
- 4. Evidence if the inputs and suggestions (point above) are been/will be taken into consideration and explain, if possible why yes or why not.
- 5. **Results and conclusions** (what was worked out during the workshops and inputs in case for further or next activities).

Here below the template that you have to use for reporting the workshops, as indicated above: it is also available in the *Repository CASCADE / WP 5 / ACT. 5.2 & ACT. 5.3*Workshops reports folder

https://drive.google.com/drive/u/2/folders/1zg6tkCEUNLwcDcIQQQWEufYHxfnhEWmO

# **Upload the reports on Cascade Repository**

After the preparation of report about workshop, upload the document in *Repository CASCADE / WP 5 / ACT. 5.2 & ACT. 5.3 Workshops reports folder* <a href="https://drive.google.com/drive/u/2/folders/1d7">https://drive.google.com/drive/u/2/folders/1d7</a> 1n9GC2-8sU7A4N5MPVykYdYp1ynZD please when you upload the workshop report, create a specific folder with your partner name and put the report inside).

Cascade
Workshop Sacca di Goro
Thursday 17<sup>Th</sup> November 3.00 PM

Event follow up report

Work Package:	5. Pilots for endangered species restoration and Integrated coastal/marine management system
Activity	5.2 - Restoration actions supporting endangered species 5.3 – Integrated coastal/marine management systems
Deliverable:	5.2.2 - Organization of 2 workshops for each Pilot Area 5.3.2 - Organization of at least 2 workshops (also virtual) for each Pilot for stakeholders engagement (at least 15 for each workshop) and capacity building on integrated coastal/marine management systems

Project Partner:	PP8 Delta2000 in coordination with other PPs involved in the Pilot Area actions: PP1, PP6, PP7	
Name of event:	Workshop Sacca di Goro - Integrated coastal zone management: aquaculture and ecosystem in the Sacca di Goro	
Date:	Thursday 17 <sup>TH</sup> September, 3.00 PM	
Event type:	Workshop	
Event venue:	Sealogy Fair Ferrara	
Short description of the event:	Workshop aimed to present the issues for restoration and integrated management and innovative models for a sustainable coexistence between man and environment. Spatial information systems for coastal zone management, with particular reference to fisheries and aquaculture. The workshop dealt whit both the iusses relating to site monitoring and its management.	

# Speakers speeches, brief summary and conclusion:

In agreement with Delta 2000 the original project of the workshop was modified: in order to reach more public and give the highest visibility to the event it was organized within the context of the exhibition Sealogy in Ferrara. Indeed Sealogy promotes and enhances the protection and safeguarding of the marine ecosystem and sustainable development, with conferences, demonstrations and showcases related to the Blue Economy. With the collaboration of **Lorenzo Marchesini**, president FLAG Coast of Emilia-Romagna, and the kind partecipation of **Piergiorgio Vasi** on behalf of Regione Emilia-Romagna, the workhop saw the intervention of experts to discuss the topic of "Integrated coastal zone management: aquaculture and ecosystem in the Sacca di Goro". **Giuseppe Castadelli** - Professor of Università degli Studi di Ferrara - presented the project LifeAgree, a model of cooperation between public and private parties for sustainable aquaculture and the protection of lagoon ecosystems.

**Fabio Fiori** - expert in fishing and aquaculture of Coop M.A.R.E. of Cattolica - held a discussion on *offshore wind generators issues and opportunities*.

**Vadis Paesanti** - managing director FLAG Costa Emilia-Romagna- unveiled the new perspectives and opportunities of fisheries and aquaculture in the area of Sacca di Goro.

In accordance with the partners and in order to give more visibility to the project the exhibit on Foce del Bevano was displayed to the public the occasion of the Cascade Workshop Sacca di Goro - Integrated coastal zone management: aquaculture and ecosystem in the Sacca di Goro - organized within the context of the exhibition Sealogy in Ferrara. The project has led to the creation of six totem upon wich are articulated the four main topics of the information path:

- The maritime ecosystems of the territories, habitats and the consequences of climate change suffered and produced by the sea
- The historical, economic and cultural importance of the sea in the areas of interest
- The risk of pollution of the sea and its effects on the environment and human life, with particular reference to plastics at sea, one of the most urgent environmental problems to be tackled due to its gravity
- Integrated management and innovative models for a sustainable coexistence between man and sea

Through informative texts are given all the main notions and curiosities, supported and enhanced by images and photographs, to guide the visitor trough the discovery of the mouth of the river Bevano and its valuable ecosystem.

Moreover there is a subsection of each totem dedicated to little ones, to allow also children to enjoy the exhibit. On this purpose it was created "Bevanella", a cartoon mascot resembling the shape of the river, who guide childrens among the themes and informations using the simple and accessible language and visual of a comic strip. In order to be as inclusive as possible the exhibit has been provided of qr codes from which is possible to access the texts declined in CAA version, Augmentative Communication Alternative, allowing also people with visual impairment to appreciate the exhibit.

Priority Axis: Environment and cultural heritage

Specific objective: Improve the environmental quality conditions of the sea and coastal area by use of sustainable and innovative technologies and approaches

# Event follow up report

Work Package:	5. Pilots for endangered species restoration and Integrated	
	coastal/marine management system	
Activity	5.2 – Restoration actions supporting endangered species	
Deliverable:	5.2.2 - Organization of at least 2 workshops (also virtual) for each Pilot for stakeholders engagement (at least 15 participants for each workshop) and capacity building on restoration actions supporting endangered species	

Project Partner:	LP-Regione Puglia	
Name of event:	LET'S MAKE SPACE FOR SPECIES	
Date:	01 December 2022	
Event type:	Organized event. Webinar	
<b>Event venue:</b>	Online	
Short description of the event:	The second event of the webinar cycle on 01 December 2022 was organized to develop species recovery skills and capacities with special reference to the pilot area of the CASCADE Project including Torre Guaceto, Canale Reale Punta della Contessa and Melendugno.	
Speakers speeches, brief summary and conclusion:	Prof. Basset (PP9-Unisalento) opened the works with a presentation on Climate change and ecological responses: challenges for conservation and recovery.  Successively, dr. Antonio Nicoletti, National Manager of Protected Areas and Biodiversity for Legambiente talks about the importance of cooperation for the protection of endangered species: from Action Plans to Local Networks.  Finaly, dr. Leonardo Beccarisi, ecologist of the "Consorzio di Torre Guaceto" discussed about the ecological characters and ecosystem services of the Torre Guaceto protected area system.	
Role of CASCADE partner in the event:	The LP organized the event.  Any further detail is <a href="http://cascade.commediasrl.it/it/eventi/project-whorkshop-lets-make-space-for-species-the-road-to-recovery-2">http://cascade.commediasrl.it/it/eventi/project-whorkshop-lets-make-space-for-species-the-road-to-recovery-2</a> .  The event is online at the link <a href="https://www.youtube.com/watch?v=A4rjEFZ-894">https://www.youtube.com/watch?v=A4rjEFZ-894</a>	
Type of audience/target groups involved:	Professionals such as architects, geologists, engineering, biologists, etc.	

Target groups (AF Section F)	Target groups reached in this event	Details of involved target
General public	59	Professionals such as architects, geologists, engineering, biologists, etc.
Local, regional and national public authorities		

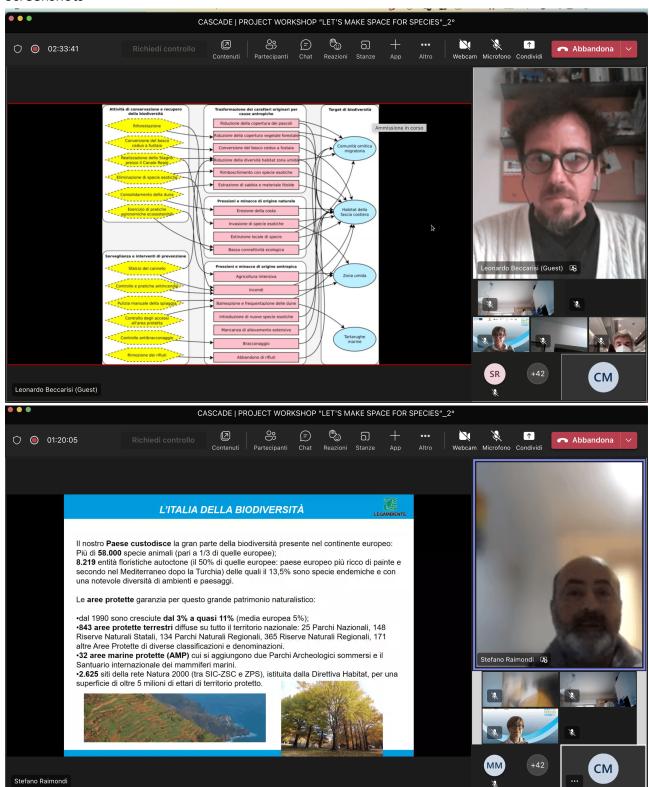

Associations		
NGOs	1	National Legambiente ( <i>National Manager of Protected Areas</i> and <i>Biodiversity for Legambiente</i> )
Education and training organizations as well as universities and research institutes

## **REGIONE PUGLIA**

È lieta di invitarti all'evento:

SECONDO WORKSHOP ONLINE CON CFP DELL'ORDINE DEGLI ARCHITETTI, RICHIESTI CREDITI APC PER GEOLOGI.

### QUANDO

1° DICEMBRE 2022 DALLE 9 ALLE 11

PARTECIPA: https://bit.ly/3AB9LNd

Sviluppo delle competenze e delle capacità di recupero delle specie con particolare riferimento all'area pilota del Progetto CASCADE comprendente Torre Guaceto, Canale Reale Punta della Contessa e Melendugno.

La partecipazione è gratuita e permette di conseguire, per ogni webinar, 2 cfp per gli architetti. Richiesti crediti apc per geologi.

REGISTRATI: https://bit.ly/3UYoXMK

European Regional Development Fund

# Cascade Workshop Area Foce Bevano

Friday 18<sup>Th</sup> November 9.30 AM

Event follow up report

Work Package:	5. Pilots for endangered species restoration and Integrated coastal/marine management system
Activity	5.2 - Restoration actions supporting endangered species 5.3 – Integrated coastal/marine management systems
Deliverable:	5.2.2 - Organization of 2 workshops for each Pilot Area 5.3.2 - Organization of at least 2 workshops (also virtual) for each Pilot for stakeholders engagement (at least 15 for each workshop) and capacity building on integrated coastal/marine management systems

Project Partner:	PP8 Delta2000 in coordination with other PPs involved in the Pilot Area actions: PP1, PP6, PP7	
Name of event:	Workshop Foce Bevano - Pollution from micro - and macroplastics at sea	
Date:	Friday 18 <sup>™</sup> September, 9.30 AM	
Event type:	Workshop	
Event venue:	Cesenatico - Cesenatico Maritime Museum, Via Armellini 18	
Short description of the event:	Workshop on the topic of pollution from micro- and macro-plastics at sea, with an analysis of the situation and interventions carried out in the Adriatic. The workshop dealt with both the iusses relating to site monitoring and its management. This in line with restoration activities carried out in Pilot Area and system of management of the Area.	
Speakers speeches, brief summary and conclusion:	In agreement with the partners the original program of the event has been modified due to a late response of the school involved, leading to the organization a workshop inside the structures of the Cesenatico Maritime Museum addressed to the students of the high school ISS Tonino Guerra of Cervia. The two classes and their teachers attended the workshop dedicated to the topic of pollution from micro- and macro-plastics at sea. The first part of the event saw the intervention of Fabrizio Caruso, expert in fishing and aquaculture of Coop M.A.R.E. of Cattolica, who first of all introduced the theme of plastic at sea and than presented the situation of the Adriatic sea and described the interventions carried out along the coast of Emilia-Romagna. The second intervention was held by Maurizio Pascucci, expert in environmental monitoring of coastal marine waters and biological laboratory analysis of ARPAE Emilia-Romagna, who gave to the partecipants a deeper insight on the work of monitoring, study and research of marine environments. In this regard, the important role of the Daphne oceanographic structure was presented. After a small break and a transfer to the Cesenatico's harbour, the chance to step aboard the Daphne for a guided tour of its structure and laboratory. This was a valuable opportunity for them to really appreciate also the more practical side of the marine sciences and research activities. Both the interventions of the experts and the tour of the Daphne were faced with pleasure and enthusiasm by the participants.	
Role of CASCADE partner in the event:	Delta 2000 Coordinated the event and organized; Arpae Emilia Romagna provided speakers and guide for the visit to the oceanographic boat ( Daphne)	

Type of audience/ target groups involved: Students, citizen

Target groups (AF Section F)	Target groups reached in this event	Details of involved target
General public	39	Two classes of the school ISS Tonino Guerra di Cervia, for a total of about 50 participants among students (aged between 14 an 18 years old) and accompanying teachers (n.39 pax)
Local, regional and national public authorities		
Associations		
NGOs		
Education and training organisations as well as universities and research institutes
