Status: final

Distribution: public/stakeholders

Date: 22/12/2021

Event summary

On December 22, 2021, the local event named *Innovative access control solution* was held in Šibenik. The event was organized in hybrid way (on site/online), and is part of the DigLogs project, financed from the INTERREG Italy-Croatia programme.

The project is intended to develop the necessary concepts, technological solutions, models and plans for the purpose of establishing advanced logistics processes in multimodal cargo and passenger transport present in the program area. It is aimed at developing plans for increasing competitiveness and harmonizing multimodal cargo and passenger transport services.

Project MIMOSA and its activities were presented by Ornella Jadreškić. She presented the pilot activities of the Port of Šibenik Authority in the MIMOSA project and the status of realization.

Audience

On the event, number of participants was 8 (onsite+online). Those were participants that represented project partners in the DigLogs project and external stakeholders. The small number of participants was caused by the COVID-19 pandemic, that strongly hit Šibenik area at the time of the event. Although the representatives of media were invited, most of them cancelled their participation due to COVID-19 reason.
