

PUBLIC EVENT REPORT

WP4 Analysing and piloting new
sustainable mobility solutions

D.4.4.3 Feasibility study on Abruzzo-
Croatia sea link with a LNG-powered ship

PP5 - ABREG
Status: final, version No.1
Distribution: public
Date: 10/07/2023

Event summary

The public event was organised in the scope of Terrà, the second energy transition Forum, which took place in Pescara, Italy, on 22-23 June 2023 <https://www.terrapescara.it/>, and dealt with the topics of sustainability, environmental protection and green transition. The Forum is an annual meeting involving national and international reference bodies and stakeholders of the sector, in order to transfer best practices in Italy, Europe and at international level. Professor Gino D'Ovidio, Director of Citrams, in representation of the Abruzzo Region, outlined the MIMOSA project and the results of the pilot actions carried out on the occasion of a round table that was held on 23rd June.

Audience

The audience participating in the Forum was composed of local, regional and national policy-makers, representatives of sectoral businesses and associations, regional and national sustainable transport networks, academics, experts, general public. The participants were about 100.

Press involvement

The Abruzzo Region Press Office was present, no media material has been published so far, apart from a tweet on @abruZZelles <https://twitter.com/abruZZelles/status/1672629059967229952> .

Event outcomes

Professor D'Ovidio, Director of Citrams, the technical partner of the Abruzzo Region in the MIMOSA project, held an address titled "Industry and computing as allies to transport development and optimisation", with the aim to tackle the issue of sustainability in the transport sector, and outline in detail the pilot actions of the MIMOSA project. The participation of Citrams was an excellent opportunity for project cross-fertilisation, and for transferring the project results in view of future capitalisation and active involvement of an increased number of stakeholders.
