for a sustainable intermodal mobility

D.5.1.4. Set of devices for border and port security
screening in the Port of Split

PP13 – Split Port Authority
Status: final
Distribution: public
Date: 10/06/2022

Event summary

On June 10, 2022, the international hybrid mid-term conference of the project SUTRA (*Sustainable Transport in Adriatic Coastal Areas and Hinterland*, project financed from the INTERREG Italy-Croatia Programme) was held. Named “Green mobility”, the live part of the conference was held in Solin, hosted by Split-Dalmatia County, one of the project partners on the SUTRA project.

The SUTRA project promotes the multimodality of passenger transport in the Programme area through the joint design of concepts of sustainable urban mobility and new cross-border connections by implementing activities aimed at improving the use of alternative electronic means of transport that better connect the coast and the hinterland.

The mid-term conference was organized by Split-Dalmatia County, and the results of the SUTRA project were presented. Except this, the presentations of few other projects that are in realization in the Split-Dalmatia County were also presented. These projects are: E-Chain, DEEP-SEA, MIMOSA, Integration of e-bikes and the project Choose bike.

Project MIMOSA and its activities were presented by Ornella Jadreškić on behalf of Split Port Authority. She also presented the pilot activities of the Split Port Authority in the MIMOSA project and the status of realization.

Audience

On the event, number of participants way around 40 (onsite + online). Two participants were representatives of regional/local public authority, one participant was representative of regional development agency, one participant was representative of higher education, while others were mostly partners of the SUTRA project and other presented projects.
