D.2.4.2. Project public events

LP – CEI-ES
PPS involved (PP12, PP3)
Status: final, version No 1
Distribution: (public)
Date: 25/11/2021

Event summary

On November 24th 2021 the CEI-ES organised jointly with PP3 a promotional event in cooperation with two other EU – funded projects ICARUS and SMACKER focusing on passengers transport networks and intermodal connections in the EUSAIR area. The main objective of this joint event was to contribute to the development of passenger transport issues within the EUSAIR area, and to provide inputs in particular to: a) Behavioural changes for sustainable mobility in the EUSAIR Region: practices and experiences from EU projects; b) Intermodality promotion in the EUSAIR region: solutions and practices from EU projects. During the first session the three projects presented their main achievements and their possible contribution to the EUSAIR. Mr. Lodovico Gherardi presented the expected results and new EU Funds related to transport in the programme period 2021-2027, with a particular focus on the EUSAIR area. Last but not least the attendees took part in the round table discussion on Regional Experiences in the sustainable mobility transport promotion.

Audience

The event was organised online and about 30 participants attended the event, among which several project partners and associated partners, 5 regional public authorities, 3 local public authorities and 1 NGO.

Press involvement

Press release was provided before the event and information was published on project and partners websites.

Event outcomes

The event offered some precious inputs for future synergies, as well as results capitalisation in the area and beyond. Further project ideas will be developed on the basis of the discussion outcomes.
