**FRAMESPORT strategy  
presentation**

**30.04.2023**

17:00 – 18:00

**Sottocosta 2023 –  
Pescara Boat Show**

## Minutes of the meeting

The Boat Show “Sottocosta” was held from 29<sup>th</sup> Aprile to 1<sup>st</sup> May at the Tourist Port Marina di Pescara.

Among the 64 exhibitors from all over Italy, operating in the nautical sector, in the field of marine activities and environmental sustainability, two partners of the FRAMESPORT project (“*FRAMEwork initiative fostering the sustainable development of Adriatic Small PORTs*”) were also present thanks to Assonautica’s invitation: ARAP Abruzzo and AAST Termoli, who dedicated these 3 days to disseminating the progress of the Interreg Italy-Croatia project on Adriatic small ports.

In addition, a workshop aimed at presenting the FRAMESPORT strategy to territorial stakeholders was also organized, in order to comply with D.3.4.1 *Strategy Presentation*.

In this context, the FRAMESPORT project was introduced by *Maurizio Cociancich, Università IUAV di Venezia* with a talk focused on the final strategy and planning of the infrastructures which are at the core of the project: small ports. In this purpose, the main vision and fields of action were presented, also providing concrete examples of initiative that could be realized to enhance the sustainable development of Adriatic small ports.

A speech by AAST TERMOLI, Agenzia Autonoma Soggiorno e Turismo di Termoli with *Mario Ialenti, project coordinator* and *Francesco Amorosa, Alfasystem representative* followed the presentation.

The partner introduced one of the Pilot Actions promoted by the FRAMESPORT project, which represent the practical side of the project aimed at testing technical solutions and experimental initiatives to identify innovative paths to solve existing problems and to drive small ports towards a sustainable growth.

Specifically, AAST Termoli will propose an app for nautical and port services development, for services located in the nearby areas, thus facilitating nautical tourism by sharing the highest possible amount of information related to the territory.
