General introduction and remarks on the FRAMESPORT project

FRAMESPORT project aims to perform a coordinated initiative supporting an integrated and sustainable development of small ports from a strategic perspective, thus allowing them to be pro-active socio-economic drivers of the development in the Adriatic coasts.

- Such a strategic objective calls for a multifaceted approach, including both the adoption of concrete pilot actions as well as the identification of priority themes to be promoted within the overall strategy.
- Priorities will be individuated by means of a bottom-up approach, involving local and national stakeholders since the project inception phase. Partners, which have been chosen in order to guarantee a wide territorial approach, will address planning and management topics, business models implementation, enhancement of training and competence, as well as develop ICT tools and services, thus supporting an effective development of small ports in the whole IT-HR area.
- Furthermore, a tailor-made ICT platform will collect and systematize relevant key data on small ports to be shared as starting point for any further development. FRAMESPORT will build on existing knowledge and capitalize the results of pilot initiatives by integrating them into a new strategic framework boosting small-scale maritime nodes, performances along the Adriatic coasts

1. MINUTES of the meeting (MoM)

The brief from the stakeholders' meeting November 22nd 2022 Molise region/Italy Termoli

D.4.4.2. Stakeholder meetings implementing database

A meeting was held on the premises of informing the public about the state of the art of the Project and the future role of the port of Termoli.

1.2. Organization of the stakeholders' meeting

- Mr. Remo di Giandomenico (AAST) opened the meeting by thanking everybody for their presence, reminding the strategic nature and importance of the FRAMESPORT project, which is now arrived at its final rush. He both thanked the University of Molise for the warm hospitality and the AEBR (European Association Border Region) on behalf of Dr. Stefano Rinaldi for having organised the first part of the event.
- Dr. Mauro Calise described to the public the overall goals of the project, which are the partners and the role of the Port of Termoli, in particular its pilot project concerning the development of a prototype of a software application for the identification, booking and payment of available spots at Adriatic Small Ports.
- Discussion continued with the engineer of "AFA System", Mr. Francesco Amorosa that illustrated the main features of the future App focalising more on the importance of developing ICT infrastructures that could allow future visitors by boat to reach Italian and Croatian small ports receiving through an app all the necessaries info (both specific and more general) for better enjoying their stay.
