General introduction and remarks on the FRAMESPORT project

- FRAMESPORT project aims to perform a coordinated initiative supporting an integrated and sustainable development of small ports from a strategic perspective, thus allowing them to be pro-active socio-economic drivers of the development in the Adriatic coasts.
- Such a strategic objective calls for a multifaceted approach, including both the adoption of concrete pilot actions as well as the identification of priority themes to be promoted within the overall strategy.
- Priorities will be individuated by means of a bottom-up approach, involving local and national stakeholders since the project inception phase. Partners, which have been chosen in order to guarantee a wide territorial approach, will address planning and management topics, business models implementation, enhancement of training and competence, as well as develop ICT tools and services, thus supporting an effective development of small ports in the whole IT-HR area.
- Furthermore, a tailor-made ICT platform will collect and systematize relevant key data on small ports to be shared as starting point for any further development. FRAMESPORT will build on existing knowledge and capitalize the results of pilot initiatives by integrating them into a new strategic framework boosting small-scale maritime nodes' performances along the Adriatic coasts.
