1

Project Acronym	Firespill
Project ID Number	10255377
Project Title	Fostering Improved Reaction of crossborder Emergency Services and Prevention Increasing safety Level
Priority Axis	Safety and resilience
Specific objective	2.2 - Increase the safety of the Programme area from natural and man-made disaster
Work Package Number	4
Work Package Title	Enhancement of emergency service organizations' operational capabilities - Pilot projects' deployment
Activity Number	4.1
Activity Title	Pilot projects planning
Partner in Charge	PP2
Partners involved	none
Status	completed
Distribution	public
Date of release:	04/2021

In the framework of the Firespill project, Cope organized a roundtable meeting that took place on April 29, 2021, concerning the project. The meeting involved various stakeholders, including volunteer associations from the Civil Protection sector, the Regional Council of Civil Protection Volunteers, and a specialist in radiocommunications.

a) **Purpose of the Meeting:** The primary purpose of the world cafe/workshop was to present and define the key objectives and strategies for Fire Fighting pilot concepts to target groups. Specifically, the meeting aimed to outline the details of training pathways for volunteers and the development of digital social tools. These initiatives were seen as critical precursors to the successful implementation of the project's pilot phase. The meeting served as a platform for stakeholders to collectively shape the project's direction and goals.

b) **Target Groups Involved:** The meeting brought together three primary target groups:

- Volunteer Associations of the Civil Protection Sector: These organizations represent the dedicated individuals who volunteer their time and expertise during emergencies and disasters.
- Regional Council of Civil Protection Volunteers: This governmental body plays a crucial role in coordinating and supporting volunteer efforts in the region.
- Specialist in Radiocommunications: The presence of a radiocommunication specialist underlined the importance of effective communication during emergency responses.

c) **Achievements and Deliverables:** The meeting's key deliverables referred to achievements in the following ways:

- **Training Pathways for Volunteers:** The meeting facilitated the initial planning and conceptualization of training programs for volunteers. These pathways aimed to ensure that volunteers receive comprehensive training in areas such as disaster management, first aid, communication, and crisis response protocols. This achievement was pivotal in preparing volunteers for their roles in future emergency situations.
- **Project Pilot Phase:** Although not directly initiated during the meeting, the discussions and decisions made regarding training pathways and digital tools paved the way for the subsequent launch of the pilot phase of the Firespill project. The meeting served as a crucial steppingstone towards realizing the project's practical implementation.

Egregio Presidente,

Il Consorzio Punto Europa, nell'ambito del progetto "FIRESPIII", finanziato dal Programma "Italia Croazia 2014-2020", che ha come obiettivo principale l'aumento della capacità operativa dei Servizi di Emergenza (Protezione Civile e Guardia Costiera) e della cittadinanza nell'affrontare catastrofi naturali e antropiche nel Bacino Adriatico, ha pianificato due interventi sul territorio della Provincia di Teramo, intesi:

- a. il primo, al miglioramento delle capacità operative AIB (Anti Incendio Boschivo) dei Volontari di Protezione Civile tramite la qualificazione di almeno 15 volontari come specialisti AIB;
- b. il secondo, all'attivazione del processo partecipativo dei cittadini per trasformare il loro ruolo da "elemento vulnerabile" a "sensore attivo" nel supporto agli operatori durante le emergenze derivanti da rischi naturali e antropici, tramite la partecipazione attiva ad un gruppo chiuso social media, istituito e gestito dalla locale Associazione di Volontari di Protezione Civile.

La invita pertanto a partecipare al tavolo operativo, che si terrà in modalità on line, **Giovedì 29 Aprile, alle ore 21:00**, durante il quale verranno illustrate e discusse le modalità operative dei due interventi e le ricadute sui territori coinvolti, accedendovi mediante il link di seguito riportato.

Giovedì, 29 aprile · ore 21.00
