The advanced training center for firefighting and civil protection in SD County (Vučevica) is established as a central administrative and logistic base for specialist fire brigades, civil protection units and base for offshore incidents in project area. It is constructed to serve as a central cross border center for presentation of best practices in the field of firefighting and civil protection through organization of specialized seminars, trainings, and simulations for different Emergency system organizations in EU and wider. It will coordinate and provide education and training of personnel in the field of protection against natural and other disasters. It is constructed and equipped with all facilities needed for simulations, organization of drills, advanced training seminars (cross border knowledge exchange), rescue demonstrations for civilians. It is intended for the accommodation and maintenance of fire trucks, vehicles and equipment, and the command and communications center. Engine room, sprinkler vent. stations, hoses and equipment repositories, and connection center, offices and classroom are integral parts of the building. The ground floor is designed for 13 garages for fire trucks, changing rooms and toilets. Upstairs there will be 15 accommodation units, along the east facade there is a fire tower, connected by a tunnel to the basement of the building.
