HVAR - one of the most beautiful islands in Croatia, but also in Europe, is a popular destination for diving lovers from all over the world. Several underwater locations enjoy world glory.

Bay Vela Greece, hiding in its underwater cave where it has a rich animal and plant world. The entrance to the cave is 10 meters deep. This dive site is suitable for beginners in diving.

Paklins Islands also have interesting diving sites. The most famous is the island of Vodenjak. In the sea around Vodenjak there is a fallen stone obelisk that resembles the bell tower, and thus to its villagers named Kampanel. The obelisk peak is 10 meters deep. Dive deeper and you will see a canyon with red gorgonians and a tunnel of 5 meters long. This dive site abounds in various types of plants and fish.

SAŽETAK I CILJ PROJEKTA

ADRIREEF projekt kombinira inovativne aktivnosti s mogućnošću socio-ekonomskog utjecaja iz djelatnosti kao što su akvakultura i turizam. Projekt će uključivati postavljanje i ispitivanje prikladnih tehnologija koje imaju mali utjecaj na podvodni svijet.

ADRIREEF ima za cilj istražiti potencijale grebena u Jadranskom moru kako bi se ojačalo plavo gospodarstvo.

Glavne aktivnosti projekta su:

- definiirati trenutno stanje jadranskih grebena na području programa klasifikacijom postojećih grebena
- inovativni integrirani sustavi praćenja abiotičkih i biotičkih deskriptora kroz usvajanje tehnologija s niskim utjecajima na okoliš
- izraditi smjernice za sudionike te Bijelu knjigu za ekonomsko i održivo eksploitanje grebena
- povećati zaposlenost kod građana Italije i Hrvatske
- ispitivanje inovativnih integriranih sustava praćenja s niskim utjecajem na okoliš
