

# COASTENERGY

Blue Energy in ports and coastal urban areas

**PROJECT DURATION**  
2019 - 2021

**ERDF**  
1,553,519.50

**TOTAL BUDGET**  
1,827,670.00

## DESCRIPTION

Increasing energy production from renewable sources is essential to reduce global emissions.

However, the development of renewable energy production plants might come into conflict with other land use needs and environmental issues. The COASTENERGY project addresses this topic with a special focus on the exploitation of marine energy in port and seafront areas, investigating possible conflicts and opportunities through the involvement of local and transnational stakeholders from both sides of the Adriatic sea.
