EXECUTIVE SUMMARY 3

EXECUTIVE SUMMARY

For each pilot case executed in D4.3.2, an Innovation Plan document was prepared. These documents contain additional information related to D4.3.2 (i.e., information on the company, innovation domain, description of the solution identified, etc.), and specific chapters dedicated to exploring a) technical feasibility and b) economic and environmental sustainability.

Aggregated results of the Innovation plans will be discussed in D4.3.4 (that will be prepared in two steps) in order to identify common needs, issues, and best practices that will be the basis for subsequent activities (especially WP5).

The Innovation Plan attachments are organized based on the local partner that managed the pilot. Please note that in the vast majority of cases there one specific Innovation Plan for a single company was prepared. However, in a few cases, there are cases where more than one Innovation Plan is related to the same company (as the company was selected for more than one idea), and were the same innovation plan refers to more than one company (as the companies presented an identical need).
