Other: project partners	/	▪
TOT	54	

EVENT DESCRIPTION

On November 6th, 2019, in Teolo Padua, was delivered a training activity for ARPA Veneto technicians on the climate change issue.

ARPAV is the regional institution devoted to environmental controls: with its 800 employees it covers all aspects related to environmental control, monitoring and analysis, while climate change is treated only as collateral aspect. The department involved in RESPONSE is a meteorological centre: having competences on climatic projections it has knowledge and awareness on importance of adaptation/mitigation measures as issue to tackle climate changes and consequences on daily life. The proposed training was thus aimed at enlarging and enriching knowledge on climate change on a strategic perspective, also for personnel involved on: air and water quality controls, industrial emissions controls, environmental analysis and educational activities.

Furthermore, the activities of the RESPONSE project were explained to the participants.

The following topics were addressed with four reports:

- “Climate and climate change a global problem” (the most recent analyzes reported by the IPCC reports were presented) - speaker Adriano Barbi Meteorologist at the Teolo Weather Center;
- “Veneto climate and evidence of climate change in our region” (focus on the Veneto region by analyzing temperature and precipitation trends) - speaker Francesco Rech Climatologist at the Teolo Weather Center;
- “Snow, glaciers and permafrost: indicators of climate change” (effects of climate change on mountain areas) – speaker Mauro Valt snow specialist at the Avalanche Center of Arabba (BL);
- “Climate change and the Response project” (framework of initiatives on climate change in which ARPAV is involved) - speaker Francesco Rech Climatologist at the Teolo Weather Center.

54 ARPAV technicians participated in this professional training activity.

The course was formally part of the official training processes of the staff of the Regional Agency for Environmental Prevention and Protection of the Veneto (ARPAV).
