EVENT DESCRIPTION

On 13 December 2019, UNIVPM participated in the IX edition of the "Beyond Globalization" Conference organized by the Italian Society of Geographical Studies. The 2019 edition, held in Trieste, proposed a discussion on the boundaries among people and territories. One of the conference sessions, coordinated by UNIVPM, hosted discussions on the influence of administrative, legislative or cultural boundaries in disaster risk management and reduction.

Particularly noticed was the presentation of the first results of the Interreg RESPONSE Project regarding different spatial scales of mitigation and adaptation strategies to Climate Change in the Adriatic area.
