EVENT DESCRIPTION

Energy Institute Hrvoje Požar and City of Šibenik organized local event titled “City of Šibenik- Local community, challenges and responses to climate change”. Main goals of the organized workshop were:

1. Introducing participants to the goals and activities of the RESPONSE project
2. Initial collection of data required for the development of SECAP

In total, the 11 participants attended the workshop, together with one member from EIHP and 2 from City of Šibenik.

EIHP and city of Šibenik presented ongoing projects related to sustainable development and climate change. Special focus was project Response, its main contribution to local community (SECAP) and collection of required data for SECAP development.

The workshop ended with vivid discussion about natural hazards, sectors of SECAP interest and current state in forestry, fire department and water management.
