EVENT DESCRIPTION

On 13 November 2020 the Università Politecnica delle Marche (UNIVPM) organized the webinar "Adattarsi ai cambiamenti climatici: la risposta di Montemarciano" (Adapt to climate change: the response of Montemarciano), in collaboration with the Montemarciano Municipality.

The webinar involved stakeholders and citizens of Montemarciano and focused on climate change and the impacts and effects on the Montemarciano territory. An in-depth focus was dedicated to the European Interreg Project Italy-Croatia RESPONSe on mitigation and adaptation strategies to climate change in the Adriatic.

The webinar included an interactive section in which the participants had the possibility to express their opinion on what should be done to reduce the emissions of greenhouse gases and limit the effects of climate change on the territory.

The audience, composed by different citizens and stakeholders, was captivated and satisfied by the content of the conference.
