EVENT DESCRIPTION

Energy Institute Hrvoje Požar and City of Ploče organized first local event titled “City of Ploče-Local community, challenges and responses to climate change” as a part of activities in WP5
 Main goals of the organized workshop were:

1. Presentation of methodology for conducting Risk and vulnerability analysis and energy part of SECAP (BEI)
2. Presentation of initial results of RVA for sectors and hazards (7 sectors-Agriculture, Tourism, healthcare, Fishery, Forestry, Biodiversity, Coastal management, and Water supply affected with selected natural hazards caused by climate change.

In total, the 6 participants attended the workshop, together with one member from EIHP (Ilja Drmač).

The workshop ended with vivid discussion about selected natural hazards and presented results. The main problem for EIHP team (except one member on the site, 4 members presented their work on line) was to clarify difference between general problems in sectors and hazards caused by climate changes. After the meeting, lunch for organized for the interested participants where discussion was continued in informal form.
