# 1 Introduction

The Adriadapt news stories has been designed to provide widespread information about the project activities. Every social media or web post contained update on project recent activities and events. Deliverable 2.3.2. is a document showcasing news stories posted to the project website and social media profiles (i.e. Twitter and Instagram)

## 1.2 Web posts

### 1) 20.03.2019. Adriadapt Kick-off meeting

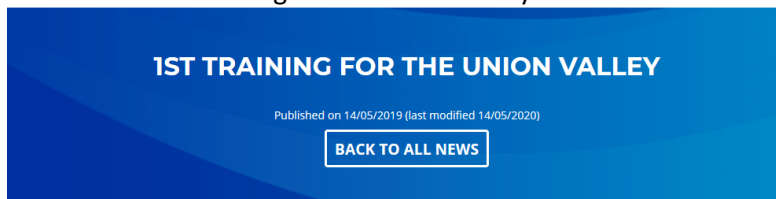

#### 18.03.2019. Started Adriadapt Kick-off meeting.

All project partners gathered on the first day of our kick off meeting. Some of the activities on the meeting were:

- Francesco Musco from IUAV presenting in the last session of the kick off meeting covering the topic of testing integrated resilience tools for Adriatic cost areas.
- Daria Povh from UNEP\_PAPRAC presenting tools and strategies for a Climate resilience knowledge base in the Adriatic.
- Presentation held by DOOR on project's communication and dissemination activities.
- Presentation from the Interreg Italy - Croatia CBC Managing Authority.
- Presentation of cities' expectations of the project: Šibenik Knin County, Vodice, Comuni Valle del Savio, Comune di Cervia and Comune di Udine.

### 2) 14.05.2019. 1<sup>st</sup> Training for the Union Valley

On Monday 13 May 2019, the first training course dedicated to the technicians of th

The training course entitled "Adaptation to climate change in the activity of Local Authorities: strategies, opportunities, challenges to plan adaptation" involved the managers who deal with strategic planning, environment and land management, civil protection, together with colleagues from the Municipality of Cervia and Udine. The course included a part of project presentations conducted by the key Italian technical partners and in particular CMCC, IUAV and ARPAE.

An updated picture of the regional policies on climate and sustainable development were then presented by Alessandro Rossi of ANCI - Emilia Romagna Region (National agency of Italian municipalities) and some best practices were presented by Emiliano Vettore of the start-up GreenDEV, including the Municipal Plan of the Waters of the Municipality of Isola Vicentina.

In the second part of the morning, an operational working table was proposed to collect process and management criticalities on territorial and land management, detailed climatic challenges. The aim of the cooperative exercise was to start defining a common framework on adaptation and an analysis for future scenarios.

### 3) 17.06.2019. 1<sup>st</sup> Newsletter is Out

#### We have launched our first newsletter.

We invite you to look it up and subscribe:

English, follow here: <https://www.italy-croatia.eu/documents/275818/275826/Adriadapt+Newsletter+-+issue+no.+1.pdf>

#### 4) 11.07.2019. Adriadapt questionnaire on climate change impacts and adaptation

*The questionnaire is targeting local and regional PA with aim to obtain an overview of the impacts of climate change underway or expected for eight different sectors (water, sea, land, biota, air, health, tourism, energy) and any activities undertaken by local authorities in the field of adaptation to climate change*

The aim of this questionnaire is to define the **current situation, attitudes and needs** associated with local **adaptation strategies**, in order to successfully prepare the **tools and the platform** for assistance in production of adaptation and resilience plans.

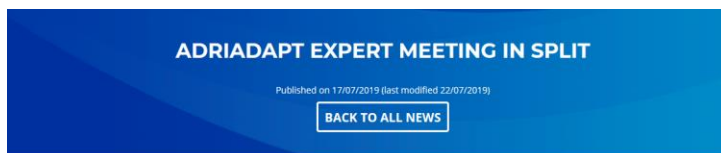

The questionnaire has been submitted to both, Italian and Croatian, municipalities in the Adriatic basin.

It is still open to public and local Adriatic municipalities can fill in the Adriadapt questionnaire on climate change impacts and adaptation in two languages as for the following links:

[Adriadapt questionnaire in Italian language](#)

[Adriadapt questionnaire in Croatian language](#)

#### 5) 15.07.2019. Adriadapt Expert meeting in Split

**Under the motto “The whole is greater than the sum of its parts” the meeting among project partners and external expert was to prepare, structure and coordinate contents of the Adriadapt guidelines and key publications across different areas of work.**

On June 12th and 13th the first ADRIADAPT expert meeting took place in Split (HR).

Under the motto “The whole is greater than the sum of its parts” the meeting among project partners and external expert was to prepare, structure and coordinate contents of the Adriadapt guidelines and key publications across different areas of work. The meeting was held on June 12-13, to:

- secure common understanding of the key terms;
- harmonize the approaches;
- co-ordinate key strategic publications for guidelines and the knowledge platform;

Besides PAP/RAC and IUAV, the project leader CMCC representative participated to the meeting as well as the representatives of the partner responsible for communication/dissemination DOOR and the Croatian local partners Vodice and Šibenik-Knin County, as well as partners responsible for the creation of climate data from, DHMZ and CMCC.

#### 6) 30.09.2019. 2<sup>nd</sup> training for the Union Valley

**On 27th of September 2019, back to back with the 2nd project meeting organized in Cervia (IT), a second training course dedicated to the politicians were organized to involved directly the elective representatives.**

Some politicians from the Municipalities of the Savio Valley participated in the training course together with the administrators of the Municipality of Cervia. The course allowed politicians to go into detail on the strategic objectives of the project thanks to the presence of all the technical partners who illustrated the possibilities for developing climate plans within the cities.

ARPAE presented the first climate analysis on a regional scale and the statistical forecasts of some significant climatological parameters with the horizon of the end of the century (according to two different IPCC scenarios) for the territories involved. IUAV and Thetis then illustrated what is meant by adaptation, mitigation, vulnerability and showed some examples of case studies in which adaptation measures were effectively implemented.

The meeting was moderated by Alessandro Rossi of ANCI – Emilia Romagna Region and an ARPAE expert who tried to collect from the participants the priorities on adaptation also in social and economic terms, the fragility of the territory and any planning processes already underway. Another fundamental step in the ADRIADAPT planning process at the local level!

7) 31.10.2019. 2<sup>nd</sup> Newsletter is Out

**We have launched our second newsletter.**

We invite you to look it up and subscribe:

English, follow here: <https://www.italy-croatia.eu/documents/275818/275826/ADRIADAPT+Newsletter+-+Issue+no.+2.pdf>

8) 11.12.2019. Vulnerability Analysis presented to the Union Valley

**On 10th December 2019, Filippo Magni (IUAV) presented the first vulnerability and climate analysis of the territory of the Union Valley in the framework of WP5 to the technicians and directors of the municipalities responsible for urban planning process, sustainable development and Civil protection.**

The meeting was an important training moment for municipal staff to illustrate the analysis methodology that starts from the use of climate data and land use maps, focused on the most specific climatic impacts such as landslides, floods and fires in the mountain part of the territory and heat waves and floods in urbanized areas. The methodology is a useful tool within the political and planning cycle for adaptation. During the meeting, ARPAE was also present, which illustrated a first hypothesis of stakeholder engagement strategy to accompany the key sectors involved at local level on planning for adaptation with specific communication and training actions.

9) 23.02.2020. Adriadapt training course in Vodice, Croatia

## ADRIADAPT TRAINING COURSE IN VODICE, CROATIA

Published on 23/02/2020 (last modified 14/05/2020)

[BACK TO ALL NEWS](#)

### **The Adriadapt training course on adaptation to climate change was organised for the experts and technicians of the City of Vodice (local partners in the Adriadapt Project).**

The Adriadapt training course on adaptation to climate change was organised for the experts and technicians of the City of Vodice (local partners in the Adriadapt Project). It took place on 20 February at the Vodice City hall. The training course, led by IUAV Venice (with support of CMCC and PAP/RAC), aimed at providing knowledge and scientific and regulatory references to identify relevant adaptation options, tailored to climate change effects that impact the most: urban heat and flash floods of Vodice. The meeting resulted in active exchange of information and experience on the actions needed to make future project activities more operational.

### 11) 24.04.2020. Adriadapt project meeting held online

## ADRIADAPT PROJECT MEETING HELD ONLINE

Published on 24/04/2020 (last modified 29/04/2020)

[BACK TO ALL NEWS](#)

### **The ADRIADAPT project meeting took place online on the 22nd and 23rd of April, 2020, due to COVID-19 situation.**

The ADRIADAPT project meeting took place online on the 22nd and 23rd of April, 2020, due to COVID-19 situation.

On the first day, 22nd of April, the project partners have discussed the activities in the cities and how to use the ADRIADAPT experience to help build climate plans for other cities. They have also covered project plans for the future dissemination activities, such as project videos showcasing expertise in climate and resilience which would be publicly available.

On the second day, 23rd of April, the first session was focused on the climate data and content creation for the knowledge platform soon to be publicly available. The second session was dedicated to the project management challenges during the COVID-19 situation.

### 12) 18.06.2020. Adriadapt work presented at the WATERCARE conference

**The conference was held in Split, Croatia.**

On the 17th of June, at the conference of the Watercare project, Ivan Sekovski from PAP/RAC presented our work on the ADRIADAPT project, alongside thematically similar projects: Asteris, PEPSEA, ECOMAP, NET4Plastic, CITYWATERCYCLES.

13) 30.10.2020. Adriadapt 2<sup>nd</sup> project meeting held online

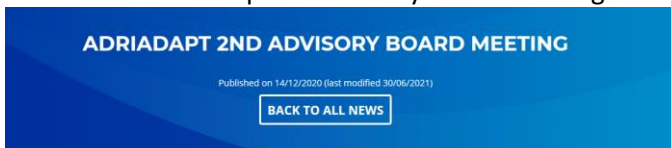

**The ADRIADAPT project meeting took place online on the 28th and 29th of October, 2020, due to COVID-19 situation.**

The ADRIADAPT project meeting took place online on the 28th and 29th of October, 2020, due to COVID-19 situation.

On the first day, 28th of October, the project partners have held the first part of the 2nd online project meeting, discussing on local activities in the cities done so far, but also what is next to be done, as well as for the knowledge platform which is slowly, but surely starting to take its shape.

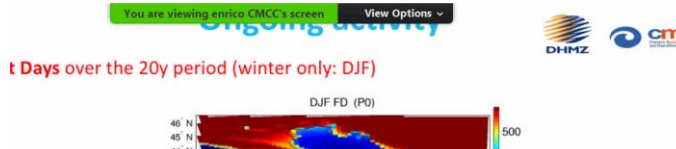

On the second day, 29th of October, the project consortia has been discussing the next project activities, which include the grand event that should be held as a final conference of the project in May, 2021.

14) 14.12.2020. Adriadapt 2<sup>nd</sup> Advisory Board meeting

**The ADRIADAPT 2nd Advisory Board meeting took place online on the 11th of December, 2020, due to COVID-19 situation.**

The ADRIADAPT's 2nd Advisory Board meeting was held online on the 11th of December, where the project partners and advisory board members discussed the activities in local areas, the knowledge platform and climate data, as well as dissemination activities and the final conference in Venice.

15) 08.01.2021. 4<sup>th</sup> Newsletter is Out

**We have launched our fourth newsletter.**

19) 28.04.2021. Online konferencija “Klima se mijenja – promijenimo se i mi! – Konferencija za obalne županije, gradove i općine”

Dana 11. svibnja 2021. godine, u online formatu održat će se konferencija “Klima se mijenja - promijenimo se i mi! - Konferencija za obalne županije, gradove i općine”.

Konferencija će okupiti predstavnike jedinica lokalne i regionalne samouprave, razvojnih agencija i relevantnih centara i institucija te zainteresirana javnost. Sudionici će imati priliku upoznati se s nabrabama na koje donoseći odluka mogu (polažati) oporak i prilagodbu svojih područja na utjecaje klimatskih promjena. Osim ideja i uspjeha inicijativa, prezentirat će se i različite mogućnosti financiranja.

Prijava na konferenciju je obavezna putem poveznice: <https://us02web.zoom.us/j/8230c29u4j75u2gk0v0rth>. Broj sudionika je ograničen.

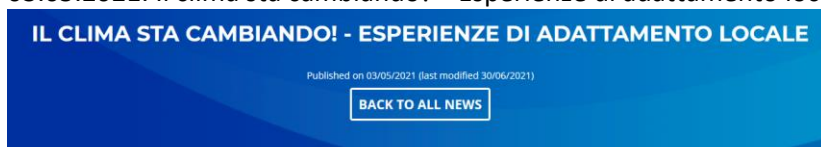

Ova nacionalna konferencija održat će se u okviru projekta ADRIADAPT. Projekt sufinancira Europska unija iz Europskog fonda za regionalni razvoj.

Partneri organizatori: PAP/IRAC, Džavani hidrometeorološki zavod, Grad Vodice, Šibensko-kninska županija i Društvo za oblikovanje održivog razvoja.

20) 03.05.2021. Il clima sta cambiando! – Esperienze di adattamento locale

**\*12 maggio 2021\***

La conferenza italiana del progetto ADRIADAPT presenterà le esperienze locali dei due anni di lavoro sull'adattamento urbano e sulla generazione della conoscenza necessaria per guidare comuni dell'area Adriatica nella definizione e implementazione di piani di adattamento e resilienza locali. L'incontro sarà occasione di riflettere sulle esperienze maturate e intende avviare una discussione con rappresentanti di autorità regionali e nazionali su possibili forme di supporto durevoli per l'adattamento locale.

Registratevi alla conferenza attraverso questo link:  
<https://us02web.zoom.us/j/8230c29u4j75u2gk0v0rth>

Per evitare disguidi, il link di registrazione sarà personale: una volta approvata la vostra registrazione, riceverete un'email di conferma con il link per partecipare al meeting.

### 31) 27.06.2021. Adriadapt Deliverable: Preparation of the knowledge platform

**This knowledge platform for the Adriatic region contains an overview of different adaptation options, case studies, guidance documents, legal frameworks and other useful material on climate change adaptation. The knowledge platform was tested during the implementation of Adriadapt pilot projects.**

The project consortium decided to implement the toolbox in the form of an on-line knowledge platform as a flexible and accessible form for providing content information. For all sections, the language can be selected between English, Italian and Croatian. The content of the platform is presented according to four thematic areas:

- About: Presentation of the ADRIADAPT project <https://adriadapt.eu/about/>
- Knowledge: presentation of five areas of knowledge items generated
- National and EU Policies: presenting brief introductions and links to relevant EU and international policy documents <https://adriadapt.eu/national-and-eu-policies/>
- Country Profiles: presenting links to relevant policy and legal documents for the two partner countries. <https://adriadapt.eu/country-profiles>

Find out more: <https://www.italy-croatia.eu/documents/275818/2773040/D+4.4.1+Preparation+of+the+knowledge+platform.pdf/657cd46f-ee90-1cd6-b7e4-acc8185fd097?t=1631277886815>

### 32) 27.06.2021. Adriadapt Deliverable: Report on guidelines for building coastal resilience

## ADRIADAPT DELIVERABLE: REPORT ON GUIDELINES FOR BUILDING COASTAL RESILIENCE

Published on 27/06/2021 (last modified 10/09/2021)

[BACK TO ALL NEWS](#)

**Adriadapt – a resilience information platform for Adriatic cities and towns, is a collective effort of 6 Italian and 5 Croatian partners aiming to promote local and regional resilience by developing the knowledge base required to identify suitable climate adaptation and planning options, thereby enabling local authorities to respond to policy needs related to climate action in urban and coastal zones of the project area.**

The Project is structured in 5 working packages (WPs), where within WP4 and WP5 strategic guidelines for local and regional authorities are to be developed. These publications also serve as the backbone of the knowledge platform. An expert meeting was organized by PAP/RAC in Split in June 2019 in order to harmonize the approaches and secure efficient collaboration of the partners responsible for WP4 and WP5. The meeting was attended by the representatives of the partners responsible for all WPs, besides WP 3, but with the representatives of the WP 3 a Skype session was organized.

Find out more: [https://www.italy-croatia.eu/documents/275818/2773040/O\\_4.1.3\\_Report+on+guidelines+for+building+coastal+resilience+.pdf/d37362b-450e-1673-7725-4b22fe5e867e?t=1631277351697](https://www.italy-croatia.eu/documents/275818/2773040/O_4.1.3_Report+on+guidelines+for+building+coastal+resilience+.pdf/d37362b-450e-1673-7725-4b22fe5e867e?t=1631277351697)

### 33) 27.06.2021. Adriadapt Output: Description of specific needs for guidance

## ADRIADAPT OUTPUT: DESCRIPTION OF SPECIFIC NEEDS FOR GUIDANCE

Published on 27/06/2021 (last modified 10/09/2021)

[BACK TO ALL NEWS](#)

**This WP aims to provide selected, user-friendly information for the Adriatic cities and other interested stakeholders, in form of best practice examples, guidance documents, legal frameworks as well as specific climate and vulnerability studies for the area, supporting diagnosis and policy solutions for local resilience.**

The questionnaire implemented within the ADRIADAPT project aimed to assess the perceptions and the needs of the local and regional authorities related to climate change impacts in the project area, i.e. Adriatic local authorities of Italy and Croatia. It can be viewed as a screening of the existing knowledge on climate change and the level of preparation to tackle its impacts by the local and regional authorities of the project area.

### 34) 27.06.2021. ADRIADAPT Deliverable: Expert Meeting Report on Strategic Outputs of the WP4 & WP5

## ADRIADAPT DELIVERABLE: EXPERT MEETING REPORT ON STRATEGIC OUTPUTS OF THE WP4 & WP5

Published on 27/06/2021 (last modified 10/09/2021)

[BACK TO ALL NEWS](#)

**Adriadapt - a resilience information platform for Adriatic cities and towns, is a collective effort of 6 Italian and 5 Croatian partners aiming to promote local and regional resilience by developing the knowledge base required to identify suitable climate adaptation and planning options, thereby enabling local authorities to respond to policy needs related to climate action in urban and coastal zones of the project area.**

The Project is structured in 5 working packages (WPs), where within WP4 and WP5 strategic guidelines for local and regional authorities are to be developed. These publications will also serve as the backbone of the future knowledge platform. This expert meeting was organized in order to harmonize the approaches and secure efficient collaboration of the partners responsible for WP4 and WP5.

The meeting was attended by the representatives of the partners responsible for all WPs, besides WP 3, but with the representatives of the WP 3 a Skype session was organized. In order to secure synergies and to multiply the project outcomes representatives of similar projects and of potential users were invited to a special session on training and dissemination. The complete list of participants is given in Annex I, the Agenda in Annex II and a group photo is given in Annex III.

### 35) 28.06.2021. Adriadapt deliverable: Report on catalogue of adaptation measures

## ADRIADAPT DELIVERABLE: REPORT ON CATALOGUE OF ADAPTATION MEASURES

Published on 28/06/2021 (last modified 10/09/2021)

[BACK TO ALL NEWS](#)

**The main purpose of this document is to present the structure, process of development and the final contents of the catalogue of adaptation measures for Adriadapt knowledge platform.**

During the project implementation it was decided to structure the catalogue in the two main categories:

1. Adaptation options
2. Case studies

During the project implementation, the possibility of use of short videos was recognized as an excellent opportunity for the communication of the knowledge accumulated. herefore, prezzi tool was used to prepare several presentations which were filmed and all partners were invited to join the effort of preparing, producing, filming and formatting videos for the knowledge management platform.

Find out more: [https://www.italy-croatia.eu/documents/275818/2773040/D+4.2.1\\_Report+on+catalogue+of+adaptation+measures.pdf/247387e2-95f7-cc87-9484-d29023447c3a?t=1630940459314](https://www.italy-croatia.eu/documents/275818/2773040/D+4.2.1_Report+on+catalogue+of+adaptation+measures.pdf/247387e2-95f7-cc87-9484-d29023447c3a?t=1630940459314)

### 36) 28.06.2021. Adriadapt Deliverable: Report on the catalogue of climate change adaptation measures with mitigation effects

## ADRIADAPT DELIVERABLE: REPORT ON THE CATALOGUE OF CLIMATE CHANGE ADAPTATION MEASURES WITH MITIGATION EFFECTS

Published on 28/06/2021 (last modified 10/09/2021)

[BACK TO ALL NEWS](#)

**The main purpose of this document is to present the structure, process of development and contents of the catalogue of adaptation measures with mitigation effects within the Adriadapt knowledge platform.**

In addition to possible measures that can be implemented to improve adaptation to climate change (categorized in three groups: societal, green, and grey options), eleven case studies were chosen, that showcase the most representative adaptation options. Those case studies, already being carried out in a specific location of the Mediterranean basin, are aimed at supporting policy makers, as well as local authorities, in their efforts to cope with the effects of climate change, giving a clear example how those measures are feasible in a real time and with a real budget.

Find out more: [https://www.italy-croatia.eu/documents/275818/2773040/D+4.3.1\\_Report+on+catalogue+of+CCA+measures+with+mitigation+effects.pdf/3fb2122b-0ab5-926a-3891-9ac93f9a9bd3?t=1630940261030](https://www.italy-croatia.eu/documents/275818/2773040/D+4.3.1_Report+on+catalogue+of+CCA+measures+with+mitigation+effects.pdf/3fb2122b-0ab5-926a-3891-9ac93f9a9bd3?t=1630940261030)

### 37) 28.06.2021. Adriadapt deliverable: Definition of a set of climate change indicators co-designed with stakeholders

Published on 28/06/2021 (last modified 10/09/2021)

[BACK TO ALL NEWS](#)

**This document provides a short description of the climate data that will be delivered by CMCC to the ADRIADAPT project users.**

This document provides a short description of the climate data that will be delivered by CMCC to the ADRIADAPT project users, covering the period from 1951 to 2100, following two different possible radiative emission scenarios for the XXI century: a business as usual one and a more moderate one. High resolution (12km X 12km for each simulated grid cell) meteorological fields (temperature, wind, precipitation among others) will be made available in a common format over the case study domains defined within ADRIADAPT.

Find out more: [https://www.italy-croatia.eu/documents/275818/2773040/D.3.1.1\\_Adriadapt\\_Definition+of+a+set+of+climate+change+indicators+co-designed+with+stakeholders.pdf/e8563818-5bc1-5fc2-450d-9cc47172bac1?n=1624987054193](https://www.italy-croatia.eu/documents/275818/2773040/D.3.1.1_Adriadapt_Definition+of+a+set+of+climate+change+indicators+co-designed+with+stakeholders.pdf/e8563818-5bc1-5fc2-450d-9cc47172bac1?n=1624987054193)

### 38) 29.06.2021. Adriadapt Deliverable: Description of guidelines for mainstreaming adaptation into coastal management along Adriatic coasts

**ADRIADAPT DELIVERABLE: DESCRIPTION OF GUIDELINES FOR MAINSTREAMING ADAPTATION INTO COASTAL MANAGEMENT ALONG ADRIATIC COASTS**

Published on 29/06/2021 (last modified 14/07/2021)

[BACK TO ALL NEWS](#)

**The aim of these guidelines is to provide planners and policy-makers in Croatia and Italy with guidelines to mainstream climate action into management of coastal regions, including:**

- An overview of the impacts of climate variability and change on coastal zones,
- Information on how to focus integrated coastal zone management (ICZM) on climate action,
- Lessons learned from the experience of handling climate variability and change in specific locations.

These guidelines were developed as a part of the Activity 4.1 "Tools and strategies for a climate resilience knowledge base in the Adriatic" of the AdriAdapt project. This activity falls under the Working Package 4 of the Project, which aims to provide selected, user-friendly information for the Adriatic cities and regions and all other relevant stakeholders in form of good practices examples, guidelines and studies that will support diagnosis and policy solutions for local resilience.

**The document (D3.2.2) provides a description of the climate data that has been delivered by CMCC, Arpa and DHMZ to the ADRIADAPT project users, both in terms of dynamical and statistical downscaling outputs.**

The document (D3.2.2) provides a description of the climate data that has been delivered by CMCC, Arpa and DHMZ to the ADRIADAPT project users, both in terms of dynamical and statistical downscaling outputs. These tools are shortly presented in Section 2, the climatic variables delivered within the project are presented in Section 3. The report also includes a deep analysis of the performance/skill of the statistical downscaling technique implemented by ArpaSimic. This work completes the historical validation process that has been already provided for the dynamical downscaling in the previous deliverable (D3.2.1). The results of statistical validation over Italian and Croatian case studies are presented in Sections 4 and 5 for temperature and precipitation indices. The analysis of statistical validation of SD is concluded with a description of trends in simulated and observed time series of temperature and precipitation, presented in Section 6. The validation of statistical downscaling (SD) has been done for the seasonal mean and extreme indices of temperature and precipitation described in D3.1.1: "Definition of a set of climate change indicators for stakeholders"

### 40) 29.06.2021. Adriadapt Deliverable: Detailed quantification of climate change signal in the region of interest with special emphasis on severe impacting events

**ADRIADAPT DELIVERABLE: DETAILED QUANTIFICATION OF CLIMATE CHANGE SIGNAL IN THE REGION OF INTEREST WITH SPECIAL EMPHASIS ON SEVERE IMPACTING EVENTS**

Published on 29/06/2021 (last modified 14/07/2021)

[BACK TO ALL NEWS](#)

**This document (D3.3.1) provides a description of the projections of climate indicators over different periods and radiative scenarios based on data delivered by CMCC, Arpae and DHMZ to the ADRIADAPT project users, both in terms of dynamical (see deliverables D3.2.1), and statistical (see deliverable D3.2.2) downscaling outputs.**

Within the ADRIADAPT project, the simulated data cover the period 1961 to 2100, following historical forcing up to 2005 and two different possible radiative emission scenarios to the end of the century: a business as usual (RCP8.5) and a more moderate one (RCP4.5). Result for future periods will be mainly presented as deviation from the base line historical period (1986-2005, named P0) over different time slices: 2021:2040, 2041:2060, 2061:2080, 2081:2100 named respectively P1, P2, P3, P4. The used tools are shortly presented in Section 2, the climatic variables delivered within the project are presented in Section 3, as recap of D3.2.1 and D3.2.2. Section 4 focuses on the projections resulting from the dynamical downscaling over the whole domain and section 5 focuses on projections over the case study cities, as resulting from both dynamical and statistical downscaling approach. Projections for the main parameters required by stakeholders and project users, case study by case study, have been considered.

- 41) Adriadapt Deliverable: release of a preliminary set of climate data and indicators made available through the project platform

**ADRIADAPT DELIVERABLE: RELEASE OF A PRELIMINARY SET OF CLIMATE DATA AND INDICATORS MADE AVAILABLE THROUGH THE PROJECT PLATFORM**

Published on 29/06/2021 (last modified 24/08/2021)

[BACK TO ALL NEWS](#)

**This document (D3.2.1) provides a preliminary description of the climate data that has been delivered by CMCC to the ADRIADAPT project users. Within ADRIADAPT project, data are provided for the period from 1951 to 2100, following historical forcing up to 2005 and two different possible radiative emission scenarios to the end of the century.**

In this document we will focus on data evaluation over the historical period only. Future projection evaluation will be the subject of D3.3.1 "Detailed quantification of climate change signal in the region of interest with special emphasis on severe impacting events" due at month 24. High resolution (12.5km X 12.5km for each simulated grid cell) meteorological fields (temperature, wind, precipitation among others) have been made available in a common format over the domain defined within ADRIADAPT. Based on these fields, a series of extreme events indicators at the daily time scale have been identified in D3.1.1 "Definition of a set of climate change indicators for stakeholders" and part of these indicators are described in this document and compared to observational data sets. A complete description of the parameters identified by ADRIADAPT stakeholders - within the list of parameters suggested in D3.1.1 - will be the subject of D3.2.2 document due at month 18. A set of four Regional Climate Models (RCMs) participating to the EURO CORDEX project on the EUR-11 grid is used.
