SUMMARY

On September 2, 2020 the event “**Training for Farmers**” was held in Benkovac near the city of Zadar. The event was organized by AGRRA in the framework of WP2. The local event was attended by 29 participants, and published in various local media. The event helped the participants to better understand the GECO2 project and the “Field to Fork” strategy for the new program period. Due to the challenging times of the pandemic, the event was held under preventive measures due to Covid. The local event was held in Croatian but most of the documentation is available in English. In the following report, the agenda, minutes, PPT presentations and event follow-up are provided.

Agenda

TRAINING FOR FARMERS

GECO2 - Green Economy
and CO2

Agenda

02.09.2020.

02. September 2020.

Training for farmers at the terrace "Milonga", Benkovac

18:30 Participant registration

18:45 Green market and voluntary carbon market

18:45 Basic Information about GECO2 project

19:00 Climate changes

19:15 The influence of agriculture, new technologies

19:30 The development of carbon market

19:45 Circular economy

20:00 GECO2 expected results and suggestions

20:15 Strategy "From Field to Fork" and new program period

20:15 Basic Information about Green Deal and Strategy "From Field to Fork"

20:30 Common Agricultural policies and VFO 2021.-2027.

20:45 Banquet

European Regional Development Fund

ZADAR COUNTY RURAL DEVELOPMENT AGENCY

is pleased to invite you:

Green Market and Voluntary Carbon Market

WHEN

02.09.2020.

WHERE

Benkovac, terrace "Milonga"

18:30	Participants' registration
18:45	Green Market and Voluntary Carbon Market
20:15	Strategy "From Field to Fork" and new program period
20:45	Banquet

or mobile phone 099 880 34 82

European Regional Development Fund

Minutes of the “Training for Farmers” event

As part of the GECO2 project, a Training for Farmers was held in Benkovac, where the principles and examples of the Green Economy were presented, with an emphasis on the Carbon Dioxide market. Through this workshop, farmers had the opportunity to find out what their role is and what are the ways to reduce and maintain Carbon Dioxide emissions. They also had the opportunity to find out what these problems are and possible scenarios that could happen related to extreme climate change. Farmers are also familiar with the future development of the carbon market, market models, but also the results and great economic benefits of such a market.

The Project Manager **Ivana Dević** from **AGRRA** paid special attention to the basic requirements of the new Rural Development Program for the period 2021-2027, especially those related to climate and the environment and green economies such as the CO2 market.

Through the workshop, farmers were introduced to the European Green Deal for a new, sustainable and inclusive strategy for economic growth and development, improving human health and quality of life, caring for the environment and equal opportunities for all.

The Coronavirus crisis has shown how vulnerable we are and how important it is to re-establish a balance between human activities and nature. At the heart of the Green Deal are biodiversity and Field-to-Fork strategies, which point to a new and better balance between nature, food systems and biodiversity to protect the health and well-being of our citizens while increasing the European Union's competitiveness and resilience. These strategies are a key part of the great transition that is just beginning. Also, the new situation caused by the Coronavirus pandemic makes such projects even more important because it is inevitable that the world, including Croatia, will soon have to turn to its own agricultural production with special emphasis on organic production, which must become the main driver in the future and the holder of the economy, points out the Project Manager **Ivana Dević**.

 Sviđa mi se Budite prvi među prijateljima kome se ovo sviđa.

Agencija za ruralni razvoj Zadarske županije trenutno je u provedbi projekta „Green economy and CO2 - GECO2“. Riječ je o projektu čija ukupna vrijednost iznosi oko 2,5 milijuna eura, a financira se iz prekograničnog programa suradnje Interreg Italija-Hrvatska.

GECO2 se pridružuje borbi protiv klimatskih promjena razvijajući nove poljoprivredne i industrijske modele. Cilj projekta je uspostava regionalnih centara za promatranje klimatskih promjena kao i predstavljanje hrvatskim i talijanskim tvrtkama novog dobrovoljnog tržišta ugljika kroz ekonomsku valorizaciju poljoprivrednih praksa. Potencijalni kupci su primjerice industrijske ili uslužne tvrtke koje žele na tržištu sudjelovati s održivim proizvodom koji će nositi markicu „CO2 free“ čime bi njihovi proizvodi dobili dodanu vrijednost. Projekt bi omogućio stvaranje mreže lokalnih centara za praćenje klimatskih promjena u Jadranskoj regiji i time bi pomogao lokalnim zajednicama u prilagodbi i smanjenju negativnih učinaka klimatskih promjena, navodi voditeljica projekta Ivana Dević iz Agencije za ruralni
