Joint_SECAP

JOINT STRATEGIES FOR CLIMATE CHANGE ADAPTATION IN COASTAL AREAS

The project idea reflects the necessity to operate at a wider district level and better define strategies and actions for climate change adaptation, especially for those weather and climate changes and hydrogeological risks affecting coastal areas.

01.01.2019 - 30.06.2021

Total budget: € 2.094.857,00

Financing is provided from ERDF: €1,78 MLN

National co-financing: € 314.288

JOINT STRATEGIES FOR CLIMATE CHANGE ADAPTATION IN COASTAL AREAS

European Regional Development Fund

MAIN VULNERABILITIES AND RISKS OF CLIMATE CHANGE

- Lack of River management and financial resource.
- → Inadeguate maintenance of the green river bank.
- → Lack of Energy production diversification.
- → Soil sealing.
- → Lack of water system planning.

MAIN MEASURES FOR ADAPTATION TO CLIMATE CHANGE

- Coastal protection > Protection interventions at risk of erosion.
- → Energy efficiency of public.
- → Promotion of sharing services(bicycles, Scooters, etc...).
- → Trees planting and green areas increase.
- increase of permeable areas.

MAIN MEASURES TO MITIGATE **CLIMATE CHANGE**

- 1. Energy efficiency of public buildings
- 2. Urban reforestation
- 3. Introduction electric vehicles into the public transport service
- 4. Enhancement of smartworking in public administration
- 5. Enlargement of the bicycle paths
- 6. Technical regulations and tax incentives that favor renewable energy
- 7. Energy saving campaign
