

SECOND MEETING OF THE PARTNERS OF THE PMO_GATE Project

The second meeting of the PMO-GATE (**P**reventing, **M**anaging and **O**vercoming natural-hazards risks to miti**GATE** economic and social impact) project partners has been held in Trieste on 19th and 20th February 2020. The meeting has been organised by Istituto Nazionale di Oceanografia e Geofisica Sperimentale (OGS), Trieste.

The 7 partner of the project (University of Ferrara as LP, University of Split – Faculty of Civil Engineering Architecture and Geodesy, RERA SD, OGS, National Institute of Geophysics and Volcanology INGV, Municipality of Kastela, Municipality of Ferrara) have met for the biannual coordination meeting on the advancement of the project's activities.

The meeting was the occasion to review the activities carried out in the first year of the Project and assess the advancement of the work packages.

Furthermore, the activities for the next year have been jointly planned.

In particular, the main topics of the meeting concerned:

- the communication activities involving all the target groups of the project and aimed at raising awareness about natural and climatic hazards in Emilia and Dalmatian-Croatian territories;
- the development of multirisk assessment methodology for the typical territorial risks (earthquake, flood, coastal flood and meteotsunami).

Communication is indeed a strategic keypoint of Interreg Projects, and a "mantra" of the project official guidelines.

The project will continue until June 2021 developing research activities, networking with all stakeholders and activating a rich dissemination program.
