Città Patrimonio dell'Umanità

As part of the PMO-GATE Project, we have created easy-to-understand graphic elements to communicate single risk and multi-risk.

We have also created a series of graphics useful for creating risk communication products.

The complete collection is shown below.

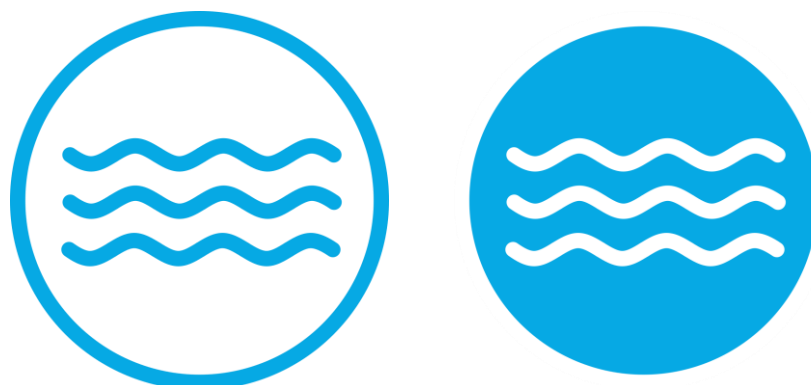

All elements are freely usable.

In case of use, it is required that the Interreg Italy-Croatia PMO-GATE Project be mentioned as the creator of the graphic elements.

For more information or to get the ".svg" files of the graphic elements you can write to: pmo.gate@gmail.com

Seismic risk

Flood risk

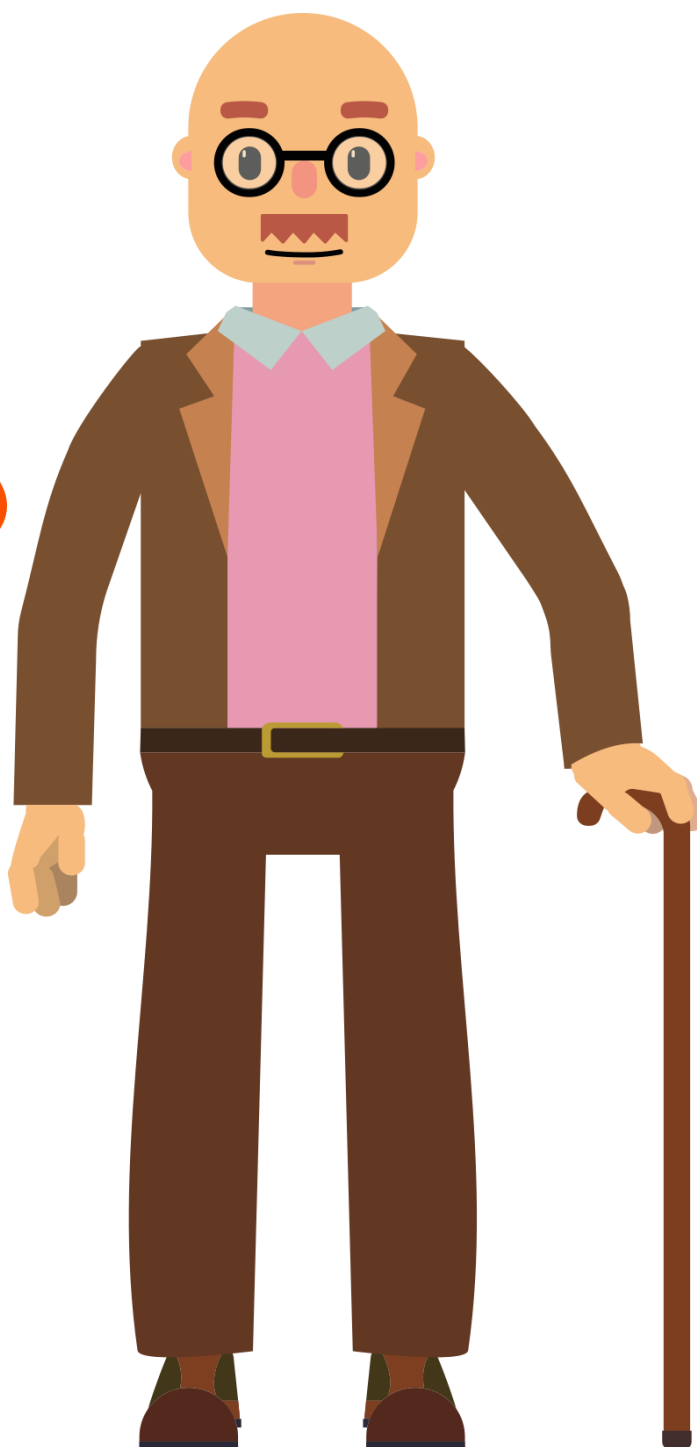

Tsunamis, meteotsunamis and extreme sea waves risk

Multirisk

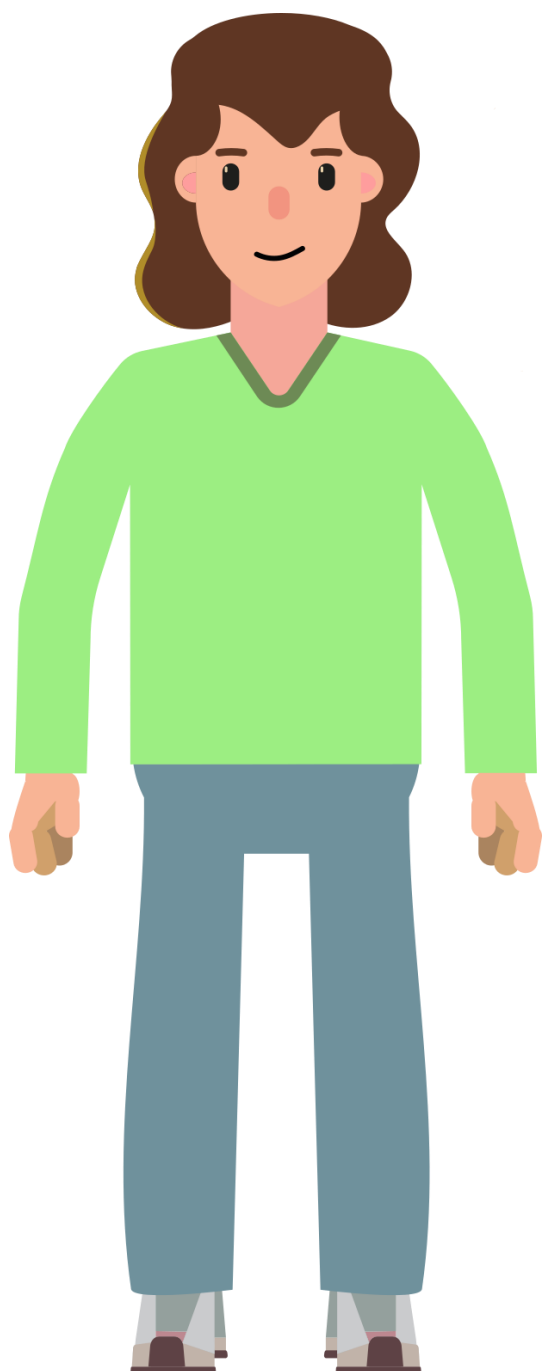

Student

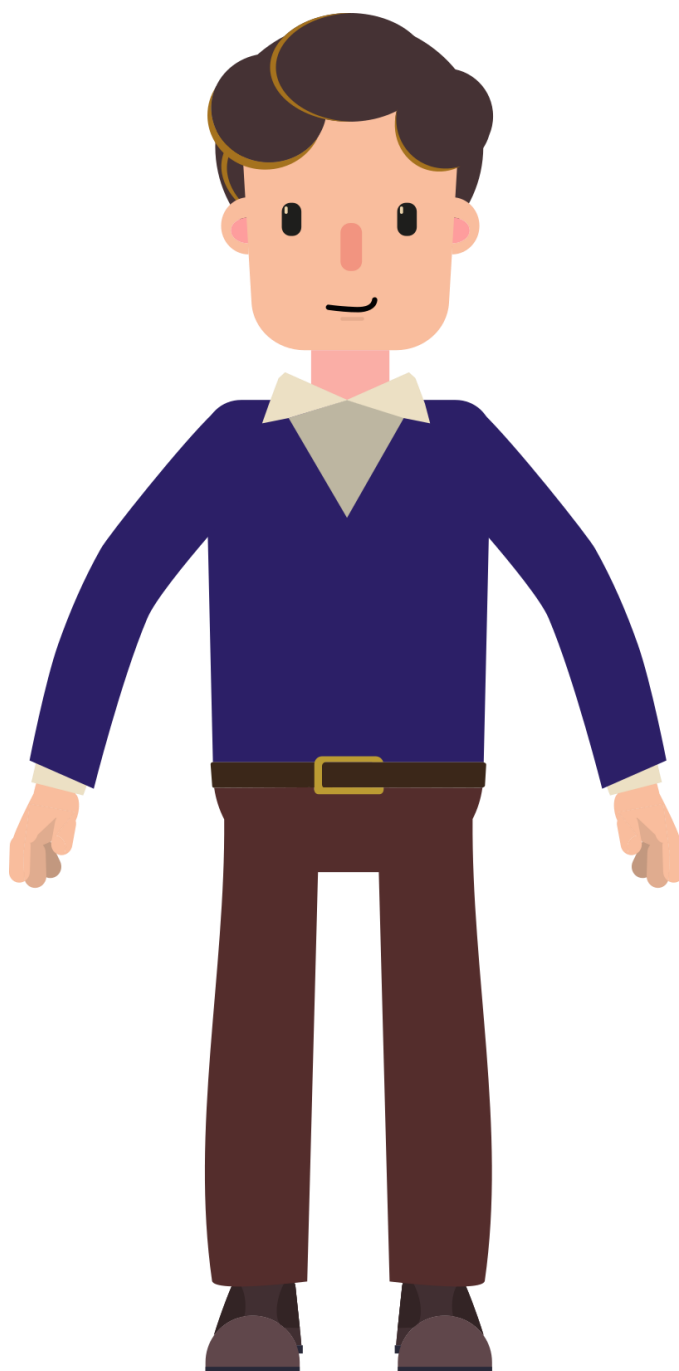

Elderly person

Child
