## Description of the activity

On 24/06/2021 the training day for the volunteer staff was set up who, in the following months, would meet the citizens in the squares of Ferrara, informing about the European project PMO-GATE, the seismic risk, also the flood risk as well as the modality of registration in the Telegram channel Municipality of Ferrara Civil Protection aimed at disseminating information relating to alerts and civil protection activities in our territory.

The course, lasting 4 hours, took place at the headquarters of the Coordination of Civil Protection Associations in Ferrara in via G. Marconi 35 and the teacher was Dr. Roberto Riccelli, member of the Civil Protection of the Municipality of Ferrara.

The didactic material used was the following:

- roll up illustrating the seismic risk;
- information leaflet relating to the European project PMO-GATE;
- information leaflet on flood risk;
- practical test of enrollment in the Telegram channel Municipality of Ferrara Civil Protection using the cell phones of each participant in the course.

The information activity for the population was carried out by the volunteers in this format and took place in the following days:

07/11/2021

14/11/2021

21/11/2021

28/11/2021

21 – 22 /05/2022

During the various days, the brochures specially prepared for flood and seismic risk, the brochure relating to the PMO-GATE project, the gadgets with the specially prepared PMO-GATE logo were distributed and the procedure for registering with the Municipality Telegram channel was illustrated of Ferrara Civil Protection.

The gazebos with the PMO-GATE logo were used for the volunteer posts and the volunteers wore the uniforms purchased with the project which also featured the PMO-GATE project logo.

Some pictures of the events are included and the list of participants.

In the picture the volunteers attend the explanations made by the Civil protection office, partner of the PMO GATE project

In the picture above the volunteers are testing the use of the telegramm app subscription in order to be able to share it with the citizens as follow up and replicability.

In the following picture the volunteers are analysin the leaflet used for the promotion of the app.
