INTRODUCTION

At the very beginning of the project implementation in a range of start-up communication activities following the branding programme manual, PP5 in charge of communication activities together with LP defined and designed basing promo materials: an official project leaflet, a project poster and roll-up. All those materials were produced by project partners in all three pilot locations to be used on the occasion of the main project events, workshops with LAG, LGS, local authorities, and other local events. All PPs have posted the project poster on their institutional premises during project implementation.

To support the production of other promotional materials next to basic event materials, PP5 prepared the "Operative manual for producing basic events Promotional items".

Operative manual for producing basic events Promotional items
