to enhance port
(in)tangible heritage

Bringing new life to old ports!

TEMPUS starts urban regeneration

The **TEMPUS** project aims at testing an experimental methodology for the urban regeneration of dismissed urban port areas, based on the co-creation of long-term, heritage-driven and community-led urban strategies.

TEMPUS brings new life to old ports in Ravenna, Solin and Rijeka

Thanks to deep social activation, cultural valorization and stakeholders' engagement, **TEMPUS** will activate temporary (re)uses within three pilot port areas (Ravenna, Solin, Rijeka), intended as trigger actions for the implementation of longer-term regeneration strategies.

TEMPUS enhances a new economic development

TEMPUS long-term primary objective is to enhance a new economic development based on the valorization of the hidden tangible and intangible port heritage, including the archaeological background and natural contexts, through the start-up of Temporary Uses Actions (TUAs).
