PROJECT DURATION

01/12/2018 – 31/05/2021

PROJECT BUDGET

ERDF 1.561.405,36 EUR
TOTAL 1.836.947,50 EUR

CREW

Coordinated Wetland management
in Italy-Croatia cross
border region

Specific objective 3.2.
Contribute to protect and
restore biodiversity

PROJECT PARTNERS

CREW is part of an Italy-Croatia Programme, supported by the European Union. The project promotes a multilevel governance tool called 'Wetland Contract', aimed at achieving global effects on the ecosystems of the coastal wetlands of the Adriatic Sea and on the related socio-economic aspects, overcoming the fragmentation that often jeopardize their integrity, development and conservation.

This leaflet has been produced with the financial assistance of the European Union. The content of the leaflet is the sole responsibility of Iuav University of Venice and can under no circumstances be regarded as reflecting the position of the European Union and/or Interreg Italy-Croatia programme authorities.

PROJECT AIMS

- To set up a cross border Observatory of coastal wetlands through the CREW OBSERVATORY platform and joint data exchange;
- Establishment of the River Contract as an integrated tool for better stakeholder coordination in Natura 2000 areas;
- To share a cross border strategy and strengthen synergies among Italian and Croatian coastal wetlands;
- To improve the public awareness on the importance of wetland ecosystems and strengthening institutions in actively participating in their management.

By implementing the foreseen actions, CREW will also promote the implementation of EU policies among Italy and Croatia. Wetland Contracts particularly help to achieve the goals of Environmental Directives such as Habitats Directive, Birds Directive, Flood Directive and Water Framework Directive.

TARGET AREAS

Northern Lagoon of Venice (Veneto Region), Sentina Natural Regional Reserve (Marche Region), Marano Lagoon (Friuli Venezia Giulia Region), Regional Park of Ofanto River (Puglia Region), Neretva River Delta (Dubrovnik-Neretva County), Veliko Blato (Zadar County) and Palud - Palù special ornithological reserve (Istarska County).
