**NETWAP**

NETwork of small "in situ"  
Waste Prevention and  
management initiatives

A green circular icon containing a white silhouette of a hand holding a small green plant with two leaves.

*With common engagement to sustainable innovations!*

## PROJECT OBJECTIVE

NETWAP project's objective is to address potential environmental damage and improve the quality of the marine environment in selected territories of the cooperation area, by increasing the awareness, ability, know-how and decision-making activities of local communities towards a sustainable waste management methodology and a system based on innovative technologies and procedures.

## PROJECT ACTIVITIES

- Elaboration of a baseline of effective waste management practices in the project area accessible via the web. The baseline will refer to the data collected in each region by the partners and will help to build new sustainable practices;
- Training of interested parties supported by the use of video clips and slides as EPUB3 Open source files. These can be downloaded in all project languages

(Italian, English and Croatian) from any computer platform and mobile device that allows you to reach a large audience;

- 2 composter installation pilot actions with the support of companies specialized in the bio and green economy sector, in order to assure potential customers that the product compound is safe, reliable and of high quality. In this way compost, will no longer be a waste, will generate economic alternatives for local communities, which could commercialize the output of their organic collection.
