## 1. Executive summary

GUTTA project’s external communication is based on stakeholder’s engagement. They include both Institutions, academic organizations, and private actors. In order to target the most relevant stakeholders, a database is prepared and maintained by the GUTTA consortium. It can be used for invitation to GUTTA public events and for dissemination of project results. This report includes a snapshot of the database, with contact person information obscured for protecting privacy.

## 2. Database structure

The stakeholders’ database (hereafter called “SDB”) consists in an Excel file organized into several sheets. Each sheet contains data relative to a specific stakeholder category, as listed in Sect.2.1. Furthermore, for each entry of the SDB, the fields of Sect.2.2. are filled, when available.

### 2.1. SDB Categories

	Number of entries
Academia	43
Institutions	92
Industry	104
Sectoral Agencies	103
Total	342
<b>Total unique emails</b>	<b>329</b>

### 2.2. SDB Fields

- Surname
- Name
- Organization
- Country
- Topics
- role
- email
- telephone

## 4. Conclusions

A database of more than 300 stakeholders is made available to the GUTTA Consortium. It consists of four stakeholder categories: Academia, Institutions, Industry, Sectoral Agencies. The database size is consistent with the target envisioned by the project's Communication Strategy (cf. Deliverable 2.1.3.).

The database emails have been inserted into the GUTTA dissemination mailing list ([gutta-ext@cmcc.it](mailto:gutta-ext@cmcc.it)).

All GUTTA partner Organizations contributed to this deliverable. The database is a living document and will be updated and possibly enlarged during the GUTTA project lifetime, in order to provide the most comprehensive information to serve the Communication aims of the project.
