## Event summary

*ICARUS joined forces with two other projects funded under Interreg CBC Italy-Croatia Programme - MIMOSA and E-CHAIN to present the latest achievements in the field of sustainable mobility in the crossborder area between Italy and Croatia. Almost 60 participants attended the online event during which the speakers spoke about innovative pilot actions and solutions to improve intermodal transport among the two countries. The event was held on September 23 2021, during which ICARUS partners provided an overview of its main activities and illustrated the results of the pilots performed. The focus was placed on the pilots in the Istria region (bik&train intermodality to connect coast and hinterland), the travel planner app (Happy Travel) available for download to plan journeys between Abruzzo and Croatia and the follow up of the bike tour performed by the Venice International University, cycling from Venice to Porec and testing several intermodal services.*

## Audience

*About 60 participants attended the event, among which 8 representatives of national, regional and local public authorities, two university representatives, two public transport operators and some general public.*

## Event outcomes

*The event provided some important synergies for future events and project ideas. Moreover, the presentation of other two EU funded projects (ECHAIN and MIMOSA) provided inspiration for new activities and further developments.*
