

PROMARES aims at tackling the challenges hampering the full-fledged development of the potential for maritime and multimodal freight transport in the Programme Area. Its main objective is therefore to enhance cross-border maritime and multimodal freight transport by involving transport stakeholder and policy makers facing the same cross-border challenges, from both a strategic and operational perspective, through the increased cooperation among them. The project involves 12 partners led by the Port Network Authority of the Eastern Adriatic Sea.

Analysis of the current situation on maritime and multimodal freight transport in the Ports of PROMARES

The partner Ports of PROMARES have conducted a Territorial Need Assessment (TNA) with the aim of identifying the strengths, weaknesses, opportunities and threats connected to their current situation. The results of the TNAs are the basis for the identification of the intervention needed to enhance the cross-border maritime and multimodal freight transport planning capacities.

Cross-border study on maritime and multimodal transport

A cross-border study has been conducted summarizing the single TNAs and thus the strengths, weaknesses, opportunities and threats of each port, identifying the similarities between them and the main results. These results will then feed the cross-border action plan and strategy, as well as the pilot actions.

The TNAs and the cross-border study will soon be available on the [project website](#)

Cross-border Action Plan

Based on the TNAs and the best practice analysis on ICT tools and policies, a cross-border action

plan for the enhancement of maritime and multimodal freight transport has been developed with the aim of improving the planning capacities of key stakeholders. The action plan includes also the key performance indicators that will be tested through the pilot actions.

The action plan will soon be available on the [project website](#)

PROMARES 3° project meeting

The third project meeting took place in Ancona, Italy, on January 22-23. This meeting was the occasion for project partners to present the results of their Territorial Need Assessments.

PROMARES at TRANSPGOOD final conference

PROMARES participated with a dedicated corner at the final conference of the TRANSPGOOD project, held in Venezia on Sept. 27, 2019.

PROMARES will take over from TRANSPGOOD the innovative approach on the use of ICT to facilitate intermodal transport.

PROMARES at the General Assembly of the CIVITAS PORTIS project

The Port of Trieste presented PROMARES at the 4th General Assembly of the CIVITAS PORTIS project, held in Klaipeda on September 5, 2019.

Aim of the project is testing innovative and sustainable urban mobility solutions in five European port cities. PROMARES, by focusing on making railway transport more competitive, will also contribute to achieving goals of sustainability and efficiency.

PROMARES at the project meeting of IISTEN

PROMARES was presented in Trieste at the partners of the project IISTEN on December 4, 2019. IISTEN is a ADRION funded project which aims at qualifying ADRION Ports as strategic nodes and hubs by setting up strategies, a transnational cooperation network and a joint action plan to improve hinterland intermodal connections.
