WP2 Communication activities

Act. 2.5 – Public events

D.2.5.1 Local targeted events

Event summary

Type of event	Online event
Location	Microsoft teams platform
Date of the event	28.06.2022
Time/Duration	2 hours
Purpose of the event (What was the objective?)	The event was oriented to introduce to port community the new functionalities implemented in the railway telematics systems for shunting operations (SIMA), thanks to the PROMARES project.
Short description of the event (what happened during the event?)	The event included the presentation of the new functionalities of the SIMA it system, training also the attendees on how to use the interfaces to upload and manage data. Moreover, it showed the advantages and benefits in the management of rail traffic in port area generated by the upgrade of SIMA system. Different speakers introduced the re-engineering intervention made on SIMA to SIMA2, the new architecture and the new functionalities. Moreover, specific tests on the usability of the upgraded system have also be conducted.
Results/Outcomes of the event (What are the takeaways from the event?)	All attendees gained a better understanding of the Port Community System of the Port of Venice and in particular on the module dedicated to shunting operations (SIMA 2). Also, they have been practically trained on how to use the upgraded system and on the potentialities it has. Lastly, the webinar has been the occasion to collect feedback by users of the SIMA2 and propose still new functionalities.
Number of attendees	35 attendees
Type of stakeholders/target groups that were represented	Enterprises, transport operators including operators of multimodal logistics hubs, infrastructure providers; high education, public institutions.

Criticità emerse e sviluppi futuri

E' necessario quindi un interfacciamento tra i sistemi informatici in modo tale da efficientare l'intero processo dello scambio di informazioni tra operatori
