EVENT FOLLOW-UP REPORT

Deliverable no. D.3.3.1

Study visit to Ravenna Port Authority

Event summary

Type of event	*Physical*
Location (if physical)	*Port Authority of Ravenna*
Date of the event	*1st June 2023*
Time/Duration	*11.30-13.30*
Purpose of the event (By whom was it organized? What was the objective?)	*In line with the DIGSEA project action plan, Central Adriatic Ports Authority organized a study visit to the Port of Ravenna Authority aimed at wide spreading beyond the DIGSEA project partners the results achieved through the capitalization of 4 Italy-Croatia projects on ICT application to the maritime traffic: INTESA, PROMARES, TRANSPOGOOD, DIGLOGS.* *The event was aimed also at sharing information on the latest applications of the Ravenna Port Authority's Port Community System as key ICT tool to ensure coordination, efficiency and integration of port maritime traffic for the benefit of the whole logistic chain.*
Short description of the event (what happened during the event?)	*The event was participated by several representatives of Ravenna Port Authority and by an external consultant.* *During the event, Elena Montironi, representative of ADSPMAC, presented the main objectives, expected results and activities of DIGSEA project to the Port of Ravenna Authority representatives and stakeholders. After, Francesco Magagnoli, responsible for Eu projects of Port Authority of Ravenna illustrated the experiences gained in the Eu cooperation to support the digitalization and optimization of maritime freight transport; Andrea Minardi, responsible for IT system and innovation at Port Authority of Ravenna, presented the origin and main application of the Port Community System; finally, Simon Conti, external consultant of Port of Ravenna Authority, described the commitment of the port authority in exploring further opportunities to increase the efficiency of port operations through digital twin models.*

Results/Outcomes of the event (What are the takeaways from the event?)	*The outcomes of DIGSEA project, such as project ideas for future programming period, best practices catalogues and inventory of Eu projects on ICT, are very interesting products to be shared and build upon during forthcoming calls. The PCS is a key tool to ensure the reduction of administrative burden, increase efficiency customs clearing operations and involve the maritime traffic operators in seamless and smart procedures for the benefit of the port efficiency and of the whole logistics chain.*
Number of attendees	*9 participants*
Type of stakeholders/target groups that were represented	*Representatives Central Adriatic Port Authorities, Port of Ravenna Authority and external stakeholders.*
