

# EVENT FOLLOW-UP REPORT

Organisation of the Final Conference & Thematic seminar with other initiatives/EU Programmes entitled "Green and Smart Ports in the Adriatic-Ionian Region. The decarbonisation and digitalisation of ports and freight transport: the contribution of European territorial cooperation" held in Trieste on 21<sup>st</sup> June 2023

Deliverables D.2.1.4 and D.3.3.2

## Event summary

Type of event	Physical/online
Location (if physical)	Trieste
Date of the event	21 <sup>st</sup> June 2023
Time/Duration	1 day
Purpose of the event (By whom was it organized? What was the objective?)	<p>As described in the AF, the event combined the following deliverables:</p> <ul style="list-style-type: none"> <li>• D.2.1.4 - High-level final conference. High-level public cross-border event open to main project target groups and stakeholders, involving thematic experts, to present final outputs and cluster results.</li> <li>• D.3.3.2 - Thematic seminar with other initiatives/EU Programmes. In the framework of the high-level final conference (D.2.1.4), LP organises a thematic seminar with other initiatives/EU Programmes on project results tackling ICT applied to multimodal transport.</li> </ul> <p>The objective of the event was to take stock of the state of the art of the inevitable processes of environmental sustainability and adoption of digital solutions between the ports of Italy, Slovenia and Croatia, analysing their challenges and possible joint strategies.</p> <p>Given the similar and complementary scopes, the event was organised jointly with SUSPORT (Interreg Italy-Croatia), ACCESSMILE (Interreg Central Europe) and EALING (Connecting Europe Facility) projects.</p>
Short description of the event (what happened during the event?)	<p>Over the past few years, the ports of Italy, Slovenia and Croatia have been cooperating to improve their environmental performance and efficiency through telematic solutions, both within the North Adriatic Port Association (NAPA) and in the framework of several projects co-financed by European funds and led by the Port of Trieste, among which the projects "SUSPORT - SUSustainable PORTs" and "DIGSEA - Digitisation of Multimodal Transport in the Adriatic Sea", (Interreg Italy Croatia),</p>

	<p><i>"ACCESSMILE - Improving the accessibility of the last best for rural and peripheral areas to the main TEN-T nodes in Central Europe through ICT" (Interreg Central Europe).</i></p> <p><i>The knowledge developed within the framework of these projects, together with that of the broader project "EALING - European flagship action for cold ironing in ports" (CEF Programme), was pooled by bringing together the experiences of more than thirty ports, freight villages and logistics operators from eleven European countries.</i></p> <p><i>During the conference, the main results of these projects were illustrated and a joint protocol was signed between the representatives of the ports of Italy, Slovenia and Croatia for the creation of a system of cross-border cooperation in the field of decarbonisation of the port sector.</i></p> <p><i>Among the speakers, Prof. Thierry Vanellander from the University of Antwerp presented the latest research results on the challenges and possible solutions available to improve environmental performance. Gadi Benmoshe, Vice-Chairman of the IAPH (International Association of Ports and Harbors) Data Collaboration Committee, emphasised the increasingly topical challenges related to cyber security, also in the port sphere. Finally, Prof. Pierluigi Coppola, coordinator of thematic group no. 2 of the EUSAIR Strategy highlighted the role of green and digital ports in the broader context of the Adriatic-Ionian Region.</i></p> <p><i>Anne Jensen, European coordinator of the Adriatic-Baltic Corridor, also attended the conference and visited the port of Trieste in the afternoon.</i></p>
<p><i>Results/Outcomes of the event (What are the takeaways from the event?)</i></p>	<p><i>The event promoted a fruitful discussion among different stakeholders on the importance of ICT tools in the maritime sector. The conference stressed the importance of sharing, capitalising and implementing ICT tools to promote maritime traffic growth.</i></p>
<p><i>Number of attendees</i></p>	<p><i>Presence 79 + 38 online</i></p>
<p><i>Type of stakeholders/target groups that were represented</i></p>	<p><i>EU Commission, Macro-Regional Strategies Public, local and national authorities, port authorities, research institutes, universities, general public</i></p>

**AGENDA OF THE EVENT:**

***Green and smart ports in the Adriatic Ionian Region***

***Decarbonisation and digitalisation of ports and freight transport.  
The contribution of EU territorial cooperation***

**Trieste, 21<sup>st</sup> June 2023**

**MIB - Trieste School of Management, Largo Caduti di Nassiriya, 1, Trieste  
Conference Hall “Grande Salone Generali” – Palazzo Ferdinando**

***Agenda***

9:00 – 9:30	Welcome coffee Registration / connection to the EUSAIR web platform
9:30 – 10:00	Welcome and opening speeches <ul style="list-style-type: none"> <li>• Mr. Zeno D’Agostino, President of the Port Network Authority of the Eastern Adriatic Sea, President of the European Sea Ports Organisation</li> <li>• Mrs. Anne E. Jensen, European Coordinator for the Baltic–Adriatic Corridor</li> <li>• Mrs. Cristina Amirante, Friuli Venezia Giulia Regional Councillor for Infrastructure</li> <li>• Mr. Pierluigi Coppola, Coordinator of the EUSAIR Pillar 2 “Connecting the region”</li> <li>• Mr. Carlo Zijno, Italian Ministry of Infrastructure and Transport</li> </ul>
10:00 – 10:30	European territorial cooperation and CEF for green and smart ports: the SUSPORT, EALING, DIGSEA and ACCESSMILE projects <ul style="list-style-type: none"> <li>• Mr. Alberto Cozzi, Port Network Authority of the Eastern Adriatic Sea</li> </ul>

10:30 – 11:30	<p>Keynote speeches: <i>Green and smart ports: challenges, strategies, solutions</i></p> <ul style="list-style-type: none"> <li>• <i>Greening ports: challenges, opportunities and best practices</i>, Mr. Thierry Vanelslander, University of Antwerp, Department of Transport and Regional Economics (TPR)</li> <li>• <i>Cybersecurity for ports: new challenges and solutions</i>, Mr. Gadi Benmoshe, Vice Chair of IAPH Data Collaboration Committee and Managing director of Marinnovators</li> <li>• <i>Green and Smart ports development within the European Strategy for the Adriatic-Ionian Region (EUSAIR)</i>, Mr. Pierluigi Coppola, Coordinator of the EUSAIR Pillar 2 “Connecting the region”</li> </ul>
11:30 – 11:45	Coffee break
11:45 – 12:30	<p>Round table discussion <i>Trilateral cooperation for green and smart ports: practice and outlook from NAPA</i> Moderator: Prof. Edvard Tijan, Vice Dean for Business Affairs at University of Rijeka, Faculty of Maritime Studies</p> <ul style="list-style-type: none"> <li>• Mr. Rajko Jurman, Head of Commercial Department, Port of Rijeka Authority</li> <li>• Mr. Borut Čok, Head of Department, Luka Koper d.d.</li> <li>• Mr. Zeno D’Agostino, President of the Port Network Authority of the Eastern Adriatic Sea – Ports of Trieste and Monfalcone</li> <li>• Mr. Fulvio Lino Di Blasio, President of the North Adriatic Sea Port Authority – Ports of Venice and Chioggia</li> <li>• Mr. Mario Petrosino, Head of Operations, Port of Ravenna Authority</li> </ul>
12:30 – 12:45	Partners of the SUSPORT project and Luka Koper d.d. sign the Joint Protocol for permanent cross-border cooperation on environmental sustainability and energy efficiency
12:45 – 13:00	<p>Conclusions and closing remarks</p> <ul style="list-style-type: none"> <li>• Mr. Xavier Garcia, EUSALP AG4 Coordinator</li> <li>• Mr. Franc Žepič, EUSDR PA 1b Coordinator</li> <li>• Mr. Hrvoje Grancarić, Joint Secretariat of the Interreg Italy-Croatia CBC Programme</li> </ul>
13:00	Buffet lunch

*Simultaneous translation in English, Italian and Croatian will be available*

*Please register at this [link](#)*

## POWEPPOINT PRESENTATIONS

### MR. COZZI

#### EUROPEAN TERRITORIAL COOPERATION FOR GREEN AND SMART PORTS

THE SUSPORT, EALING, DIGSEA AND ACCESSMILE PROJECTS

DECARBONISING AND DIGITALISING PORTS IN THE EUSAIR: TACKLING CHALLENGES AND TAKING ADVANTAGE OF OPPORTUNITIES THROUGH INSTITUTIONAL COOPERATION

#### PORTS ARE

- CROSSROADS OF GOODS AND PEOPLE
- SOURCE OF PROSPERITY FOR THEIR TERRITORIES
- KEY TO THEIR ECONOMIC DEVELOPMENT AND JOB CREATION
- IMPORTANT FREIGHT NODES ON TEN-T NETWORK

#### HOWEVER

- PORT OPERATIONS PRODUCE CO2 EMISSIONS
- MOST PORTS ARE NEAR CITIES
- LACK OF COORDINATED MITIGATION MEASURES
- FRAGMENTATION ALONG THE SUPPLY CHAIN
- WEAK LAST-MILE ACCESSIBILITY OF RURAL AND PERIPHERAL AREAS TO THE MAIN TEN-T FREIGHT NODES
- HIGHER TRANSPORT-RELATED AIR POLLUTION AND GREENHOUSE GAS EMISSIONS

#### MARITIME TRANSPORT IS THE MOST SUSTAINABLE WAY OF TRANSPORTING GOODS

#### TO FACE THESE CHALLENGES COOPERATION IS NECESSARY WHY?

- POLLUTION AND TRAFFIC FLOWS DO NOT STOP AT BORDERS
- THE CHALLENGES CAN NOT BE ADDRESSED ONLY AT THE LOCAL LEVEL
- THEY NEED COOPERATION AT EUROPEAN LEVEL

#### 2 CHALLENGES: DECARBONISATION & DIGITALISATION

#### EUROPEAN TERRITORIAL COOPERATION IN 4 PROJECTS

- PORTS
- LOGISTIC CENTRES
- UNIVERSITIES AND RESEARCH CENTRES
- CHAMBERS OF COMMERCE
- REGIONAL ADMINISTRATION

#### TOGETHER FOR:

##### DECARBONISATION

- SUSPORT - INTERREG ITALY-CROATIA
- EALING - CEF

##### DIGITALISATION

- DIGSEA - INTERREG ITALY-CROATIA
- ACCESSMILE - INTERREG CENTRAL EUROPE

#### DECARBONISATION

##### 2 IMPORTANT STEPS FOR JOINT PLANNING OF PORT ENVIRONMENTAL SUSTAINABILITY AND ENERGY EFFICIENCY:

- JOINT ANALYSES OF CO2 EMISSIONS
- JOINT CROSS-BORDER ACTION PLAN WITH JOINT IMPLEMENTATION OF PILOT ACTIONS

#### DECARBONISATION

##### 1) RESULTS OF JOINT ANALYSES OF CO2 EMISSIONS

CO2EQ EMISSIONS IN PORTS OF ITALY, SLOVENIA AND CROATIA (2019)

5,16%	ELECTRIC ENERGY
0,66%	HEATING
0,63%	SERVICE VEHICLES
8,08%	OPERATIONAL PORT VEHICLES
5,01%	HEAVY VEHICLES
0,38%	RAILWAY TRACTORS
0,43%	OTHER
1,29%	NAVAL PORT SERVICE
0,84%	ANCHORED SHIPS
14,00%	SHIP MANOEUVRING
63,54%	MOORED SHIPS

#### DECARBONISATION

##### 2) JOINT CROSS-BORDER ACTION PLAN WITH JOINT IMPLEMENTATION OF PILOT ACTIONS

#### SUSPORT

SUSTAINABLE PORTS - EUSAIR LABELLED - PP DEVELOPED TOGETHER WITH A CROSS-BORDER STRATEGY SEVERAL PILOT ACTIONS TO REDUCE CO2 EMISSIONS IN PORTS

#### EALING

EUROPEAN FLAGSHIP ACTION FOR COLD IRONING IN PORTS - IS A STUDY PROPOSING A COMMON EU HARMONISED AND INTEROPERABLE FRAMEWORK FOR THE TRANSITION TO ELECTRIFICATION OF EU MARITIME PORTS (OPS INFRASTRUCTURES AND EQUIPMENT IMPLEMENTATION)

#### SUSPORT - Sustainable PORTs

#### LED LIGHT BULBS

### SUSPORT - Sustainable PORTs

**PHOTO VOLTAIC SYSTEM**

### SUSPORT - Sustainable PORTs

**E-MOBILITY**

### SUSPORT - Sustainable PORTs

**COLD IRONING STUDIES**

### SUSPORT - Sustainable PORTs

**MAIN CROSS-BORDER RESULT**

expected CO<sub>2</sub> reduction

**-17,924 TONS/YEAR**

### DECARBONISATION

#### EALING

- Common EU harmonized, interoperable and sustainable framework for the deployment of Onshore Power Supply (OPS) in ports
- Port-to-vessel compatibility
- Effective launch of OPS infrastructures in ports
- Implementation of at least 20 installations in at least the 16 EU ports of the EALING Studies Action

### DECARBONISATION

#### EALING

- EUROPEAN GREEN DEAL → transition to zero GHGs emissions → transport represents 25% of the emission in the European Union
- THE ELECTRIFICATION OF THE MARITIME TRANSPORT is a key challenge for more competitive and sustainable TEN-T Maritime Network in the future
- ANALYSES OF CO<sub>2</sub> EMISSIONS HAVE SHOWN THAT IN PORTS, THE COMPONENT THAT POLLUTES THE MOST IS SHIPS AT MOORING
- ON-SHORE POWER SUPPLY (OPS)
- Is considered as an attractive solution to reduce local pollution generated by vessels at berth in the EU ports
- The activities carried out in each of the consortium's ports are aimed at performing all the studies that are necessary to accelerate the implementation of OPS in their ports
- OPS studies for the port of Monfalcone, Pier no. 5 and Logistic Platform

### DIGITALISATION

#### WHY IS DIGITALISATION IMPORTANT ALSO FOR DECARBONISATION?

- FACILITATES COOPERATION BETWEEN SUPPLY CHAIN ACTORS
- ENABLES BETTER VISIBILITY AND REAL-TIME MANAGEMENT OF CARGO FLOWS
- LEADS TO THE REDUCTION OF ADMINISTRATIVE BURDEN
- ALLOWS FOR A BETTER USE OF INFRASTRUCTURES AND RESOURCES

**ALL OF THIS MAKES TRANSPORT AND LOGISTICS OPERATIONS MORE EFFICIENT, NOT LEAST BY ALLOWING EASIER INTEGRATION OF THE DIFFERENT TRANSPORT MODES**

**PORTS = SEA + RAIL + ROAD = MULTIMODAL TRANSPORT**

DIGITALISATION CONTRIBUTES TO OPTIMISE TRANSPORT FLOWS AND SMART LOGISTICS SOLUTIONS + HELPS MEETING ENVIRONMENTAL SUSTAINABILITY TARGETS

### DIGITALISATION

DIGITALISATION OF MULTIMODAL TRANSPORT IN THE ADRIATIC SEA – EUSAIR LABELLED  
ICT EXPERIENCES AND EXPERTISE OF 4 PROJECTS TRANSFERRED TO STAKEHOLDERS AND POLICY MAKERS AT EU AND TRANSNATIONAL RAISE THE AWARENESS OF THE USE OF ICT AS A POWERFUL AND EFFICIENT TOOL FOR GREEN AND SMART PORTS/SUPPLY CHAIN

IMPROVING ACCESSIBILITY OF LAST MILE CONNECTIONS OF RURAL AND PERIPHERAL REGIONS TO MAIN TEN-T NODES IN CENTRAL EUROPE THROUGH ICT  
COOPERATING AMONG PARTNERS FOR A BETTER CONNECTED CENTRAL EUROPE

## DIGITALISATION

## DIGSEA

CLUSTERS ICT TECHNICAL KNOWLEDGE OF PREVIOUS PROJECTS APPLIED TO MARITIME AND MULTIMODAL TRANSPORT

- 01 TRANSPOGOOD** - INNOVATIVE ICT TOOLS THAT ASSISTS USERS IN FINDING THE BEST SOLUTION OF TRANSPORT SERVICES
- 02 DIGLOGS** - ICT TOOLS FOR MOST ADVANCED DIGITALISED LOGISTIC PROCESSES FOR MULTIMODAL FREIGHT TRANSPORT AND PASSENGERS' SERVICES
- 03 PROMARES** - ICT TO MAKE HINTERLAND TRANSPORT MORE EFFICIENT AND CONNECTED WITH PORTS
- 04 INTESA** - ICT TO MAKE PORT AND MARITIME TRANSPORT SYSTEM MORE EFFICIENT AND SAFE.

THE COLLECTED KNOWLEDGE CONSOLIDATED IN A SINGLE SEA PORT HINTERLAND LOGISTICS APPROACH TO IMPROVE THE EFFICIENCY AND INCREASE THE ENVIRONMENTAL PERFORMANCE OF PORTS AND THE WHOLE SUPPLY CHAIN

## DIGITALISATION

## ACCESSMILE

### ACCESSMILE > LAST MILE BY ROAD

- STARTED IN APRIL 2023
- TO SOLVE THE WEAK LAST-MILE ACCESSIBILITY OF RURAL AND PERIPHERAL AREAS TO THE MAIN TEN-T FREIGHT NODES.
- THIS CHALLENGE INVOLVES TRANSPORT OPERATORS FROM ITALY, SLOVENIA, CROATIA, AUSTRIA, HUNGARY, GERMANY AND POLAND > AFFECTED BY

- 01 MULTIMODAL TRANSPORT INEFFICIENCY**
- 02 WEAKER ECONOMIC GROWTH**
- 03 HIGHER TRANSPORT-RELATED AIR POLLUTION AND GREENHOUSE GAS**

## DIGITALISATION

## ACCESSMILE

### ACCESSMILE > LAST MILE BY ROAD

OPERATIONAL TOPICS CAN NOT BE DEALT AT LOCAL LEVEL, GIVEN THE GLOBAL NATURE OF TRANSPORT FLOWS

THIS IS WHY COOPERATION AMONG TRANSPORT OPERATORS IS ESSENTIAL

CO-DEVELOPMENT OF AN ACTION PLAN FOR IMPROVING THE LAST MILE ACCESSIBILITY OF RURAL/PERIPHERAL AREAS TO TEN-TS THROUGH ICT:

**TOPIC 1**

TRANSPORT FLOW MANAGEMENT AND VEHICLE BOOKING SYSTEMS

**TOPIC 2**

GATES AND ENTRY/EXIT TOOLS AND PROCEDURES

**TOPIC 3**

CARGO BUNDLING AND TRACKING

## FINDINGS

**Territorial cooperation plays a pivotal role in**

- increasing competences
- mutual learning
- joint medium and long-term planning

**ENHANCING DECARBONISATION AND DIGITALISATION OF PORTS THROUGH COOPERATION AMONG LOGISTIC NODES AND TERRITORIES IS THE KEY TO HAVING INCREASINGLY GREEN AND SMART PORTS**

**Thank you for your kind attention!**

**PORT NETWORK AUTHORITY OF EASTERN ADRIATIC SEA**

## MR BENMOSHE

Cybersecurity for ports:  
new challenges and solutions

IAPH Cybersecurity Guidelines for Ports:

**Gadi Benmoshe,**  
Vice-Chair IAPH DCC, Managing Director, Marininnovators

'Decarbonization and Digitalization of Ports and Freight Transport:  
The Contribution of EU Territorial Cooperation'  
21/6/23

What are the guidelines?

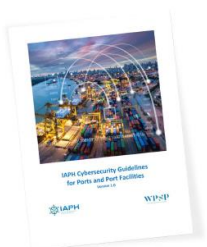

This 84 page document is the culmination of four months of intense work between 22 experts from IAPH member ports from around the world as well as Associate Member cybersecurity specialists and contributors from the World Bank.

Its purpose is to serve as a crucial, neutral document for senior executive decision makers at ports who are responsible for safeguarding against cybersecurity risks as well as ensuring the continued business resilience of their organization.

IAPH submissions endorsed at IMO FAL 46

19th OCT 2023

The 46th Meeting of the IMO Facilitation Committee (FAL 46) took place from 9 to 13 May. It was a successful meeting for IAPH with two submissions noted and approved by the Committee. Firstly there was the paper by IAPH and co-sponsors EMCDD and ISMA proposing amendments to the Maritime Single Window Guidelines to include guidance on the port call process and the operational and nautical data that may be exchanged through a maritime single window. Secondly, IAPH had submitted a proposal inviting the Committee to see the first edition of the IAPH Cybersecurity Guidelines for Ports and Port Facilities – and to consider presenting them as appropriate and referencing them in the next revision of ISMA Guidelines on Maritime Cyber Risk Management. Both documents were met with appreciation from Member States and were approved accordingly. The FAL Committee also adopted amendments to the Facilitation Convention, which will make the Maritime Single Window...

The five essential steps towards cyber resilience

- 1 Port Leaders should acknowledge cyber risk management as a top-level responsibility recognizing it as a competitive and operational imperative
- 2 Successful cyber risk management begins with and depends on a common understanding of terms, financial grounding, and recognition of shared responsibility
- 3 You cannot minimize the threat until you understand the risk
- 4 Protect, detect and mitigate
- 5 Work towards effective organizational cyber awareness

Step three

- 1 Port leaders should acknowledge cyber risk management as a top-level responsibility recognizing it as a competitive and operational imperative
- 2 Successful cyber risk management begins with and depends on a common understanding of terms, financial grounding, and recognition of shared responsibility
- 3 You cannot minimize the threat until you understand the risk
- 4 Protect, detect and mitigate
- 5 Work towards effective organizational cyber awareness

Assessing for Risk

**Assess for vulnerabilities**  
To identify and evaluate the cybersecurity vulnerabilities within the complex operating environment of a port or port facility.

**Assess for impact**  
Impact refers to the potential harm that a cyber threat might cause to a port or port facility.

**Assess for risk**  
To gain insights into the cyber risks to port and port facilities operations.

**Risk identification**

- Asset identification
- Understanding data as an asset
- Assess for threats
- Create risk scenarios

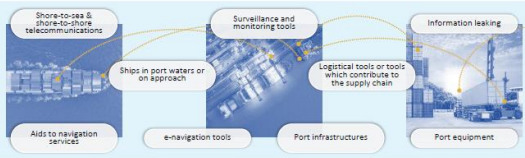

THREAT AGENT	THREAT VECTOR e.g. API errors	VULNERABILITY e.g. user privilege	TECHNICAL IMPACT ON ASSET e.g. data loss	BUSINESS IMPACT e.g. financial penalty under SLA
			Reports security controls	

• Risk analysis

Ports context : cyber vulnerabilities amplification

- Operational aspect:
  - Increased sharing of real-time data.
  - Interconnections with multiple stakeholders,
  - Complexity of business and OT systems
- Technical aspect: Difficulty in applying security updates / Continuous operation
- Smart Port trends : Increased exposure to cyberthreats

### IMO MSC 107 supports IAPH paper on cybersecurity

in Port News | 16/06/2023

The 107th meeting of the IMO Maritime Safety Committee (MSC 107) took place from 31 May to 9 June and was attended by Rhona Macdonald, Pascal Ollivier and Frans van Zoelen. On the agenda was a submission by IAPH highlighting the critical importance of cybersecurity as an inherent component of the Maritime Single Window (MSW). This paper also stressed the need for capacity-building and cooperation to implement a cyber secure MSW by the 1 January 2024 deadline. This was submitted alongside a proposal by Australia and others for a new output to revise the Guidelines on Maritime Cyber Risk Management to include the latest cybersecurity guidance and identify next steps to enhance maritime cybersecurity.

The Committee welcomed these papers with strong support from delegations for a separate output to emphasise the importance and urgency of this topic, and it was ultimately agreed to include a separate item on this on the provisional agenda for the next session. MSC also

### Smart Port trends – Supporting Cybersecurity Resilience

Smart Container use case:  
Yard inventory count and registration

- Suppose that because of a cyber-attack the TOS database can't be restored and, as a result, there is a need to manually count and register the inventory of thousands of containers in the port yard.
- However, if the yard is filled with Smart Containers that can instantly transmit their identification numbers and locations, the TOS database can be immediately updated.
- This can save many hours of manual work and enable a quick recovery from the cyber-attack.

### Difficulty in mobilizing a port stakeholders community on cyber issues

- Many stakeholders to coordinate, often interdependent
- Business ecosystem relying on multinational companies & very small enterprises
- Professionals under pressure, often behind their schedule
- Narrow Vision, silo working
- Low interest in cybersecurity topics

### Physical & non-physical impacts

### Shipping industry expects cyber-attack deaths, collisions, and groundings

As well as enabling threat actors to demand ransom, steal intelligence and cause widespread disruption - which hackers can also achieve by breaching IT networks - attacks on OT systems can disable assets or safety controls. Indeed, 56% of maritime professionals expect cyber attacks to cause physical injury or death in the industry within the next few years.

Maritime cyber security needs more investment, better regulation, and sharing of incident experiences, according to a DNV report.

Gary Howard | Jun 06, 2023

### Cyber pirates

### Defining the Organization's Cyber Ecosystem: Activities & Stakeholders

In order to manage their cyber risk port and port facility leaders must first understand what are the most critical operational activities, and who are the individual stakeholders supporting them.

#### Critical Activities:

- Activities linked to sea freight and hinterland transport (e.g. unloading and loading, etc.)
- Activities related to the transport of passengers and vehicles (e.g. border control, etc.)
- Activities related to traffic coordination (e.g. AIS, etc.)
- Industrial activities (e.g. petrochemicals, etc.)
- Fishing related activities (e.g. inspection of fish, etc.)

#### Critical Stakeholders

- Ocean transportation (e.g. shipping companies, etc.)
- Authorities (e.g. port authority, customs, etc.)
- Supply chain (e.g. freight forwarders, etc.)
- Terminal operators
- Port service providers (e.g. tug operators, etc.)
- PCS operators
- Industrial (e.g. petrochemicals, etc.)

### Defining the Organization's Cyber Ecosystem: Assets

Critical Assets – Data exchange/Systems and tools

- Mandatory declarations (e.g. FAL forms, etc.)/ (e.g. MSW, etc.)
- Control and authorization (e.g. custom clearance, etc.)/ (e.g. PCS, etc.)
- Operational data related (e.g. freight scheduling, etc.)/ (e.g. TOS, etc.)
- Financial and business data (e.g. invoicing, etc.)/ (e.g. Billing, etc.)
- Navigation and traffic management data (e.g. AIS, VTS, etc.)

Port and port facility cyber ecosystems are dynamic and its stakeholders are highly interdependent. Therefore periodic review of the ecosystem critical activities/stakeholders/assets and making appropriate adjustments, are recommended

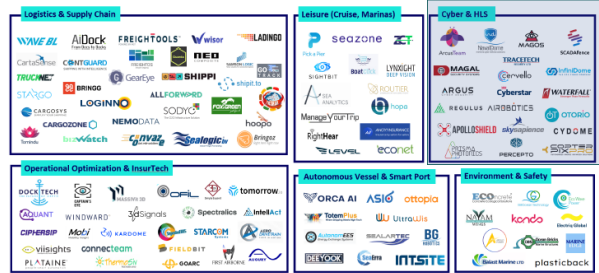

### Cybersecurity is not just for the IT department

- 1 Cyber risk is an enterprise-wide risk  
Cyber risk is pervasive. Cyber risk factors touch every aspect of the organization including administration and operations. Cyber risk management only succeeds with the active executive engagement and oversight.
- 2 People are the weakest link in cyber risk management  
Managing cyber risk encompasses people, technologies, processes. Cyber threat actors commonly target non-IT staff, which represents the majority of an organization's personnel.
- 3 The impact of cyber breaches can be disastrous  
The consequences of compromised port and/or port facilities' digital processes could result in operational disruption, affecting customers, port authorities, port community systems, and related port services.

Cyber resilience requires pre-defined decisions and pre-defined cooperation coordinated with all the stakeholders, inside and outside the port

### Israeli Maritime-Tech Startups\*

\* The chart comprises of "pure-play" maritime startups, as well as startups attending different industry but have a strong maritime use case. Copyright © 2022, THE DOCK. All rights reserved.

THE DOCK January 2022

### Cyber Solutions

- **Cydoma**  
Cyber Security Coverage for Protecting IT & Operational Assets in Ships and Ports while assuring their readiness for regulatory inspections.
- **Salvador**  
Solutions for operational continuity and cyber-attack recovery in SCADA and HMI systems
- **Cyberstar**  
A cybersecurity company, subsidiary of ZIM, the Israeli shipping line, offering Cybersecurity services such as cyber-attack simulation, cybersecurity gap analysis, etc.
- **EasySec**  
Endpoint Protection for Industrial IoT and Control Systems

CYDOME

Cyberstar

EasySec

PIONEERS

### PIONEERS' 46 PARTNERS

PIONEERS

### Green port demo's Antwerp

Demonstrations in real port environments of solutions and innovations related to green energy production, distribution and supply

WP4 partners:

PIONEERS

### Location of the WP4 demo's

- 1 Hydrogen refuelling infrastructure
- 2 Corridor of modular docking stations for energy containers
- 3 Battery storage and Smart Management of Green Energy in terminal operations
- 4 Hydropower Turbine

PIONEERS

### Integrated Green Hydropower Platform for Port Infrastructure - De Meyer

Lead partner: De Meyer NV - Masters in Mechanics  
Objective is to develop and demonstrate an end-to-end solution to convert energy from water to electricity, specifically in port infrastructure

PIONEERS

### Integrated Green Hydropower Platform for Port Infrastructure

- Back in 2017, De Meyer NV deployed a successful Hydropower Turbine Prototype in the 'Kallo Lock' (PoA)
- Result: Proven energy potential of 150 kW from one 3-blade turbine installed in a bypass sewer of the Kallo Lock

11

### Integrated Green Hydropower Platform for Port Infrastructure

In 2021, De Meyer NV completed a modular, axial-flux engine/generator to complete the Hydropower installation. (PowerGen)

12

### From Wind to Straddle - Air Liquide

Air Liquide's +40 years' hydrogen expertise at the service of the PIONEERS project:

- Energy sourcing
- Core business: production & distribution of hydrogen
- Solution development → Providing the required refueling infrastructure in order to decarbonise PSA Antwerp's fleet of straddle carriers & support a relentless operation of the terminal (currently powered by diesel → equivalent consumption > 100kg H2/day/straddle carrier)

First impressions about the HRS set-up

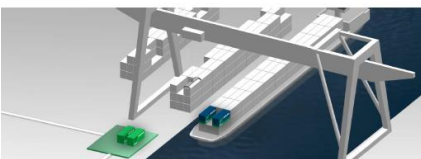

Engineering and demonstration of 350 bar, high speed hydrogen refuelling station for straddle carriers:

- Operations
- Refuelling process

→ (possible) links to Green Straddle Carriers (Task 5.4) and Modular Docking Stations for Energy Containers (Task 4.4)

### A corridor of modular docking stations for energy containers - Zero Emission Services

Exchangeable energy containers | Charging infrastructure & grid balancing | Pay per use business model

### Electric propulsion of barges by means of battery containers

- Modular Energy Concept:
    - Barge with electric propulsion
    - 20' battery container
    - Docking station
  - Important side conditions:
    - Standardization and open access
    - Green electricity
- Emission-free inland waterway transport

### Developing a network of docking stations

- PIONEERS: focus on the corridor Willebroek - Antwerp - Venlo
- Connection to other potential locations in Belgium: Ghent, Zeebrugge, Genk, Liège, etc.
- Connection to the future network in the Netherlands: Moerdijk, Bergen-Op-Zoom, etc.

### Battery storage and smart management of green energy in terminals - Antwerp Euroterminal

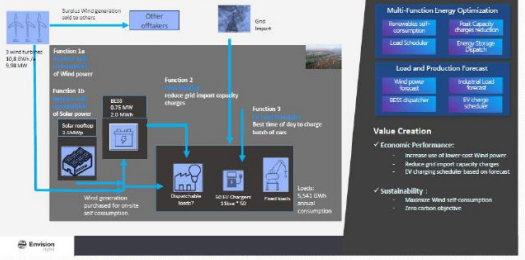

### Energy transition on AET

- 3 new windmills on quay 10 MW
- 3,8' solar park on top of new multilevel storage building
- QPDI for electric cars
- Charging poles for electric vehicles - cargo as well as own cars
- Cold ironing
- Battery Energy Storage System and Intelligent Energy management system (PIONEERS Project)

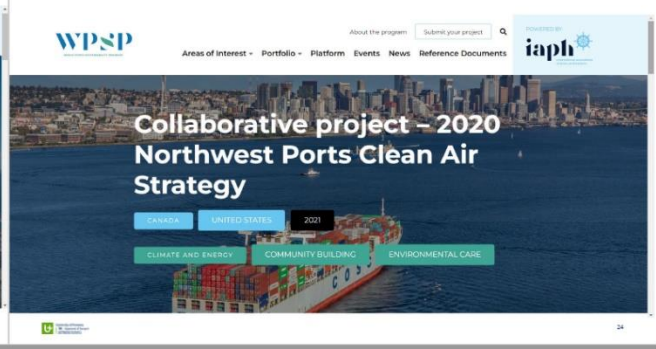

### Energy Management Architecture

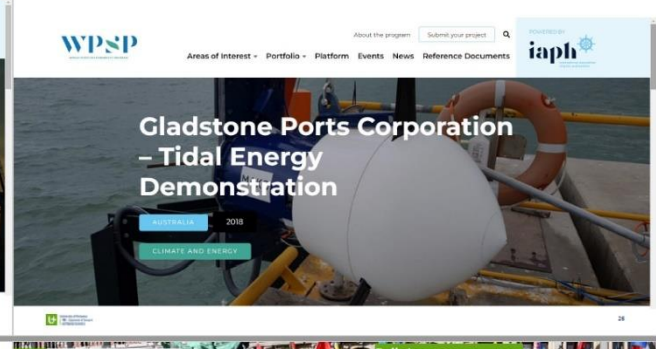

### Battery Energy Storage System and intelligent Energy management system

- Multiple uses for the same battery
  - Storage of own solar energy
  - Storage of wind energy
  - Peak shaving
  - Charging of electric vehicles
  - Stabilisation of own grid
  - Stabilisation of external Grid
- Smart software to optimize battery usage for the above mentioned cases.
  - Which kind of battery do we need?
  - What is the optimal capacity of the battery?
  - When should the battery be used and for what purposes?
- Does the puzzle fit? Can we validate a business case for a battery on terminal?
  - Which use of a battery has the best ROI?
  - "Energy storage" - better ROI if a battery is used for multiple purposes at once?

Thanks a lot for your attention!

## MR COPPOLA

EU Strategy for the Adriatic and Ionian Region EUSAIR

conference  
"Green and Smart Ports in the Adriatic-Ionian Region"

**Green and Smart ports development within the European Strategy for the Adriatic-Ionian Region (EUSAIR)**

**Pierluigi Coppola**  
EUSAIR Pillar 2 Coordinator

Trieste, 21 June 2023

EU Strategy for the Adriatic and Ionian Region EUSAIR

**Pillar 2 Overall Goal**

**To improve connectivity within the Region and with the rest of Europe in terms of transport and energy networks**

**Transport Priority Actions**

**MARITIME TRANSPORT**

- Improving and harmonising traffic monitoring and management
- Developing ports, optimising port interfaces, infrastructures and procedures/operations

**INTERMODAL CONNECTIONS**

- Developing the Western Balkans comprehensive network
- Developing motorways of the sea
- Cross-border facilitation

EU Strategy for the Adriatic and Ionian Region EUSAIR

**Project Labelling**

**INFRASTRUCTURAL PROJECTS**

1. Signalling of Trieste Port (infrastructure)
2. Heavy vehicle road, connecting the TPA 7 Port of Bari, Interregio (intermodal terminal) and the Bari rail station
3. Hydro-technical and dredge excavation on critical sectors in the Sea river
4. Improving hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
5. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
6. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
7. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
8. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
9. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
10. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
11. Hydro-technical and dredge excavation for construction of Highway 7-PA1 (Porto Ugento - Kallinikos Bay) and connecting to the Port of Ugento
12. Reconstruction and modernization of railway line Salsomaggiore (PA)
13. Technical studies on railway linking Bari between Corone - Aliphan (section Fiume - Fregene)
14. Second Railway Link Studies - Port of Rijeka
15. Technical studies on railway linking Bari between Corone - Aliphan (section Fiume - Fregene)
16. Reconstruction and upgrading of functional facilities in the Port of Bari
17. Heavy vehicle road, connecting the TPA 7 Port of Bari, Interregio (intermodal terminal) and the Bari rail station
18. Like and Differentiation Railway
19. MOBILITY ON THE COAST (COAST - COAST)
20. MOBILITY ON THE COAST (COAST - COAST)
21. MOBILITY ON THE COAST (COAST - COAST)
22. Improvement of port capacity and port services (Coast Shipping)
23. Construction of new passenger terminals in the Port of Corfu
24. Improvement of freight infrastructure and services at the Port of Corfu
25. Construction of new passenger terminals in the Port of Corfu
26. Construction of new passenger terminals in the Port of Corfu
27. Construction of new passenger terminals in the Port of Corfu
28. Construction of new passenger terminals in the Port of Corfu
29. Construction of new passenger terminals in the Port of Corfu
30. Construction of new passenger terminals in the Port of Corfu
31. Construction of new passenger terminals in the Port of Corfu
32. Construction of new passenger terminals in the Port of Corfu
33. Construction of new passenger terminals in the Port of Corfu
34. Construction of new passenger terminals in the Port of Corfu
35. Construction of new passenger terminals in the Port of Corfu
36. Construction of new passenger terminals in the Port of Corfu
37. Construction of new passenger terminals in the Port of Corfu
38. Construction of new passenger terminals in the Port of Corfu
39. Construction of new passenger terminals in the Port of Corfu
40. Construction of new passenger terminals in the Port of Corfu
41. Construction of new passenger terminals in the Port of Corfu
42. Construction of new passenger terminals in the Port of Corfu

**SOFT MEASURES**

1. ADRIAFED (Empowering multimodal connections in the Adriatic-Ionian region)
2. MARAFED (Multidisciplinary approach and solutions to develop Intermodal transport in the Region)
3. EURIFA - EU Forum of Maritime Administrations in the Adriatic-Ionian Region
4. UNICOM (EU Commission and port operators for the development of the sustainable alternative fuel for intermodal transport)
5. AMANTIAN (Adriatic Water Train: Fluctuating transport plan for the Northern Adriatic sea)
6. Adriatic-Ionian rail ports network
7. Adriatic-Ionian Core Route (ADRIACORIS)
8. ADRIACORIS Core Route (ADRIACORIS)
9. ADRIACORIS Core Route (ADRIACORIS)
10. ADRIACORIS Core Route (ADRIACORIS)
11. ADRIACORIS Core Route (ADRIACORIS)
12. ADRIACORIS Core Route (ADRIACORIS)
13. ADRIACORIS Core Route (ADRIACORIS)
14. ADRIACORIS Core Route (ADRIACORIS)
15. ADRIACORIS Core Route (ADRIACORIS)
16. ADRIACORIS Core Route (ADRIACORIS)
17. ADRIACORIS Core Route (ADRIACORIS)
18. ADRIACORIS Core Route (ADRIACORIS)
19. ADRIACORIS Core Route (ADRIACORIS)
20. ADRIACORIS Core Route (ADRIACORIS)
21. ADRIACORIS Core Route (ADRIACORIS)
22. ADRIACORIS Core Route (ADRIACORIS)
23. ADRIACORIS Core Route (ADRIACORIS)
24. ADRIACORIS Core Route (ADRIACORIS)
25. ADRIACORIS Core Route (ADRIACORIS)
26. ADRIACORIS Core Route (ADRIACORIS)
27. ADRIACORIS Core Route (ADRIACORIS)
28. ADRIACORIS Core Route (ADRIACORIS)
29. ADRIACORIS Core Route (ADRIACORIS)
30. ADRIACORIS Core Route (ADRIACORIS)
31. ADRIACORIS Core Route (ADRIACORIS)
32. ADRIACORIS Core Route (ADRIACORIS)
33. ADRIACORIS Core Route (ADRIACORIS)
34. ADRIACORIS Core Route (ADRIACORIS)
35. ADRIACORIS Core Route (ADRIACORIS)

41. ADRIACORIS Core Route (ADRIACORIS)
42. ADRIACORIS Core Route (ADRIACORIS)

51 projects

EU Strategy for the Adriatic and Ionian Region EUSAIR

**Green and Smart Ports concept as EUSAIR Flagship**

**Specific objectives**

- Technology testing in ports to identify the technical and operational challenges
- Mapping of local and macro regional needs and development of network of ports to be transformed in accordance with the developments of the Macroregional Transport Masterplan
- Supporting to zero emission actions as well as promotion of interoperability through the development of the required infrastructure among the ports of the Region through the digitalisation of the provided services and the development of innovative ICT solutions to support the supply chain
- Supporting circular economy projects in ports finding solutions in turning waste to products due to their ideal background (proximity to large cities, industries as well as by operating as hosts of ships' waste)
- Alignment of the EUSAIR States regulatory framework for the electrification of ports

The EUSAIR Pillar (Transport sub-group) study

**What is «Green & Smart»?**  
(in the AI Region)

**What role for the European Territorial Co-operation (ETC) ?**

Supporting:  
- the MA operating in the AI Region in understating the needs in the sector  
- Stakeholder in the AI Region to intercept the funding opportunities coming from ETC

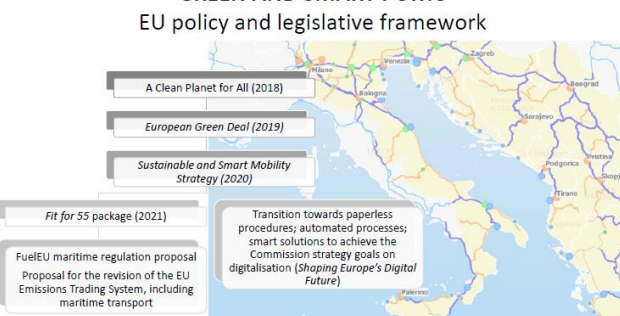

EU Strategy for the Adriatic and Ionian Region EUSAIR

**The EUSAIR Pillar (Transport sub-group) study: methodology**

- The EU policy and legislative framework
- On-going initiatives and projects in the AI Region
- Indicative actions of the new Interreg Programmes operating in the Region

**GREEN AND SMART PORTS**

EU policy and legislative framework

- A Clean Planet for All (2018)
- European Green Deal (2019)
- Sustainable and Smart Mobility Strategy (2020)
- Fit for 55 package (2021)
- FuelEU maritime regulation proposal
- Proposal for the revision of the EU Emissions Trading System, including maritime transport
- Transition towards paperless procedures; automated processes; smart solutions to achieve the Commission strategy goals on digitalisation (Shaping Europe's Digital Future)

What is «Green & Smart» ?

Scope	Theme
IMPROVING SUSTAINABILITY IN MARITIME VESSELS OPERATIONS	<ul style="list-style-type: none"> <li>Improvement of the energy efficiency and reduction of emissions of vessels</li> <li>Creation of a comprehensive network of recharging and refuelling infrastructure</li> <li>Deployment of renewable and low-carbon fuels and powering stationed vessels with renewable power</li> </ul>
PORTS AS GREEN HUBS	<ul style="list-style-type: none"> <li>Promotion of ports as new clean energy hubs for integrated electricity systems, hydrogen and other low-carbon fuels</li> <li>Greening ground port services and operations</li> <li>Promotion of ports as testbeds for waste reuse and the circular economy</li> </ul>
SAFETY IN PORTS	<ul style="list-style-type: none"> <li>Enhancing transport safety and security</li> </ul>
DIGITALISATION IN PORTS	<ul style="list-style-type: none"> <li>Development of efficient capacity allocation and traffic management systems</li> <li>Diffusion of innovation, data and AI for smart mobility and cybersecurity</li> </ul>

EU Strategy for the Adriatic and Ionian Region  
EUSAIR

### The EUSAIR Pillar (Transport sub-group) study: methodology

- The EU policy and legislative framework
- On-going initiatives and projects in the AI Region
- Indicative actions of the new Interreg Programmes operating in the Region

EU Strategy for the Adriatic and Ionian Region  
EUSAIR

### EXAMPLES OF 2014-2020 INTERREG PROJECTS

ZERO EMISSIONS IN PORTS	ADRION	IT-HR	IT-AL-ME	IT-SI
Alternative clean fuels, cold ironing and green accessibility to marinas (vessels, motorboats...)	ADRION SUPER-LNG	IT-HR DEEP-SEA, METRO		SuMo
DIGITALISATION				
ICT/digital solutions to upgrade information and data management and support multimodal integration and land accessibility to ports	ADRIPASS	IT-HR DIGLOGS, DIGSEA E-CHAIN, MIMOSA, PROMARES, STEP- UP, TRANSPOGOODO	IT-AL-ME EFINTIS, ISACC	GR-IT INVEST- MENT
ICT/digital solutions to improve sea traffic management, and safety and security of transport operations, including cybersecurity	ADRIPASS, EUREKA	CHARGE, DIGLOGS, INTESA		SECHE T
ICT/digital solutions to monitor the performance and impact of maritime transport operations at ports		ECOMOBILITY, GUTTA, TRANSPOGOODO		

EU Strategy for the Adriatic and Ionian Region  
EUSAIR

### EXAMPLES OF 2014-2020 INTERREG PROJECTS

CONNECTIVITY	ADRION	IT-HR	IT-AL-ME	GR-IT
Promote integration and connectivity between different transport modes, including last mile and hinterland connections	ADRIPASS, INTER-PASS	ADRIGREEN, ESTEN, MIMOSA, MOSES, PROMARES		SWAN
Improve conditions and competitiveness of existing or new MoS and/or small cruises infrastructure and services	MULTI-APPRO		ALMONIT-MTC, PORTS	DOCK-BI, FRESH WAYS, THEMIS
Promoting accessibility of tourists to inland destinations by maritime transport integrated with green transport solutions		ICARUS, SUSTRA	PORTS	TRUST

#### CIRCULAR ECONOMY IN PORTS (0)

EU Strategy for the Adriatic and Ionian Region  
EUSAIR

### EXAMPLES OF 2014-2020 INTERREG PROJECTS

ZERO EMISSIONS, DIGITALISATION AND CONNECTIVITY	ADRION	IT-HR	IT-AL-ME	IT-SI
Governance of planning, implementation and monitoring of projects/set up of transnational strategies and action plans	ADRIPASS, MULTIAPPRO, SUPAIR, NEWBRAIN	INTER-CONNECT, PROMARES, SUSPORT	FRAMESPORT, 4.0, ISACC	SAGOV, PORTS 4.0, ISACC
Knowledge sharing and cooperation support	SUPAIR			TRADAM, ECYT, PORTS 4.0 PORTS, ISACC
Capacity building				CRISIS
Resilience and risk management of transport operations				
Support the preparation of projects to improve their maturity for funding and financing	NEWBRAIN			

### Initiatives and projects by Theme (1/3)

	Number of projects in the ports in:					
	Albania	Croatia	Greece	Italy	Montenegro	Slovenia
<b>A. Improvement of the energy efficiency and reduction of emissions of vessels</b>						
A.1 Deployment of Liquid Natural Gas (LNG) fuelled vessels.						
A.2 Test and deployment of full electric vessels and tug.						
<b>B. Creation of a comprehensive network of recharging and refuelling infrastructure</b>						
B.1 Construction of LNG depots and facilities.						
B.2 Deployment of LNG bunkering vessels.						
<b>C. Deployment of renewable and low-carbon fuels and powering stationed vessels with renewable power</b>						
C.1 Electrification of quays and deployment of onshore power supply systems (cold ironing).						

### Initiatives and projects by Theme (2/3)

	Number of projects in the ports in:					
	Albania	Croatia	Greece	Italy	Montenegro	Slovenia
<b>D. Promotion of ports as new clean energy hubs for integrated electricity systems, hydrogen and other low-carbon fuels</b>						
D.1 Creation of green hydrogen sites for production and distribution of hydrogen power.						
D.2 Deployment of public charging points for electric vehicles.						
D.3 Use of renewable energy sources, deployment of new more efficient lighting system, creation of power management system.						
<b>E. Greening ground port services and operations</b>						
E.1 Greening port spaces.						
E.2 Greening port operations.						
<b>F. Promotion of ports as testbeds for waste reuse and the circular economy</b>						
F.1 Use of secondary material in production and construction, deployment of waste-to-energy facilities.						
F.2 Conversion of industrial and port areas.						

### Initiatives and projects by Theme (3/3)

	Number of projects in the ports in:					
	Albania	Croatia	Greece	Italy	Montenegro	Slovenia
<b>G. Enhancing transport safety and security</b>						
G.1 Improvement of infrastructure resilience and deployment of measures to contain the impact of extreme weather events.						
G.2 Planning and implementation of measures to reduce the impact of pandemics and other sanitary emergencies.						
<b>H. Development of efficient capacity allocation and traffic management systems</b>						
H.1 Further deployment of Vessel Traffic Monitoring and Information Systems (VTMIS).						
H.2 Deployment of solutions for enabling multimodal travel planning.						
H.3 Safe deployment of automated and autonomous maritime operations.						
<b>I. Diffusion of innovation, data and AI for smart mobility</b>						
I.1 Diffusion and integration of Port Community Systems at the port, port cluster, and national levels						
I.2 Diffusion of Maritime Single Window solutions and deployment of automated and paperless procedures and solutions						
I.3 Other IT solutions (rail traffic management, lot, Blockchain, port operation)						

### Initiative and projects by Country

EU Strategy for the Adriatic and Ionian Region EUSAIR		EU Strategy for the Adriatic and Ionian Region EUSAIR	
CONCLUSIONS : POSSIBLE ACTIONS		CONCLUSIONS: POSSIBLE ACTIONS	
SCOPE	ACTION	SCOPE	ACTION
Digitalisation in ports / Safety in ports	Installation of new technologies such as 5G/6G, digitalisation of public administration	Other (connectivity, human resources, R&D)	Enhancing connectivity to islands from mainland and between islands
	Virtualisation (digital twin), Internet of Things, Artificial Intelligence, Automated/unmanned terminal operations and blockchain		Integrate Short Sea Shipping routes and Motorways of the Sea with road, rail and INW networks
	Measures to develop standardised digital data sharing to support coordinated and synchronised operations		Develop/improve hinterland accessibility to freight nodes and touristic sites
	Solutions to set up automated and paperless procedures and speed up processes at nodes and throughout the logistics chain (incl. custom, security, phytosanitary checks etc.)		Training activities for the improvement of human skills and competences accompanying technological evolution, ecologic, energy and digital transition
	Just in time sea traffic management to improve safety, environmental performance and efficiency of maritime transport		Support the participation of ports to research and development activities to test and deploy innovative solutions, attract innovative businesses and services and qualified skills
	Real time information systems to users for traffic management and multimodal travel planner solutions		
	Enhance cyber security		
	Tools and actions to improve measurement and management of waste collection and treatment, land degradation, light and visual intrusion, soil and water contamination, noise and vibration impacts, loss of biodiversity and coastal erosion		

conference  
 “Green and Smart Ports in the Adriatic-Ionian Region”

Thanks for your attention!
