DIGSEA EVENT TIMELINE

EFINTIS FINAL EVENT

LET EXPO

MERIDIAN SC

CAREER DAY

FINAL EVENT INVITATION

Dear readers,

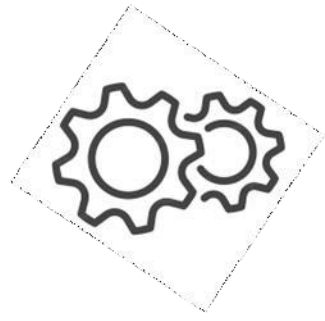

We are presenting you the second newsletter of the DIGSEA project.

In this edition, we will present you our technical works and project events.

We wish you a nice reading!

Your DIGSEA team

DIGSEA technical work

DIGSEA project clusters technical knowledge of previous projects: TRANSPOGOOD, DIGLOGS, PROMARES and INTESA. Project partners strive to transfer knowledge and raise awareness on the use of Information and Communication technology as a powerful and efficient tool to improve the efficiency and increase the environmental performance of ports and the whole supply chain.

Main project outputs are:

- Cross-border inventory of projects' results
- Transnational inventory of projects' results
- Best practice analysis
- Project ideas for the 2021-2027 programming period
- EUSAIR flagship paper
- Study visits to five Italian and Croatian ports
- Thematic seminar with other initiatives/EU Programmes on project results tackling ICT applied to multimodal transport

DIGSEA technical work

So far, partners have achieved the following:

- Cross-border inventory of projects' results, a document presenting all 4 projects capitalized by DIGSEA. Document gives a review of the 4 projects, including partners, main issues and objectives, barriers, pilot actions, results and lesson learnt. Conclusion gives the capitalisation ideas based on reviewed projects.
- Transnational inventory of project results, a document presenting 22 EU funded projects of other cross-border and transnational ETC, H2020 or CEF Programmes on ICT applied to freight transport. The objective is to collect the best international practices in the European projects on ICT in maritime and multimodal freight transport. The analysis of the main results, knowledge, and experiences will be selected and also applied in the DIGSEA program area to transfer them at the transnational level.
- Best practice analysis, a document that collect and analyses the best practices and most recent developments on ICT tools for enhancing maritime and multimodal transport. The main goal is to present those developments for an easy access to all partners and interested stakeholders and to see what can be used to enhance maritime and multimodal transport in the area and beyond.

DIGSEA technical work

- Cross-border training curriculum on ICT application in the freight transport sector, a document describing a 3 week training program that addresses multiple areas and subjects. The course is developed in 8 modules with total duration of 60 hours and includes training content, structure and format, training methods, creation of the training plan and direct measures for evaluation.
- Project ideas for the 2021-2027 programming period, a document describing three project ideas that supports the implementation of INTERREG Italy-Croatia 2021-2027 priority no 3 “Sustainable maritime and multimodal transport”, SO 3.1 “developing and enhancing sustainable, climate resilient, intelligent and intermodal national, regional and local mobility, including improved access to TEN-T and cross-border mobility”. The ideas are focused on:
 - Enhanced cyber resilience of ports
 - ICT applied to last-mile accessibility of ports
 - Digital twin for ports
- Study visits to five Italian and Croatian ports – the first two visits have been done to the ports of Bari and Zadar. Study visits are documented in the Study visit videos.

DIGSEA EVENT TIMELINE

March 2nd 2023

DIGSEA @ final event of EFINTIS PROJECT and Study visit to the port of Bari

DIGSEA was presented during the final conference of the project EFINTIS “Enhancing efficiency of the intermodal transport flows by improved ICT systems” in Bari followed by the Study visit to the port. Taking advantage of the common background of the projects, focusing on ICT solutions for the logistic sector, the Port Network Authority of the Eastern Adriatic Sea, lead partner of DIGSEA, in the framework of the project’s study tour, illustrated the most recent trends in port development highlighting the added value of the outputs realised by DIGSEA.

March 10th 2023

DIGSEA @ Let Expo in Verona

DIGSEA was presented at Let Expo in Verona. Let Expo is one of the main Transport and Logistics Fair held yearly in Italy, focusing on transport, logistics and intermodality.

RAM S.p.A., partner of DIGSEA, organised a workshop on Thursday 9th March 2023 titled “Digitalisation and European funds: ideas and project proposals”, speakers including representatives of the Italian Ministry of Transport and Infrastructures, European Commission, Italian Customs Agency and Italian Port Authorities.

DIGSEA EVENT TIMELINE

March 15th and 16th 2023
DIGSEA @MERIDIAN SC in
Ghent, Belgium

DIGSEA was presented during the MERIDIAN Steering Committee Meeting held in Ghent, Belgium, on March 15th and 16th, 2023. MERIDIAN project fosters the digitalisation of the mobility system focussing mainly on the CEF Core Network Corridors Scandinavian - Mediterranean and North Sea - Baltic. In this framework of common topics addressed by the projects regarding ICT solutions for the logistic sector, lead partner of DIGSEA, illustrated the most recent trends in port development highlighting the added value of the outputs realised by DIGSEA.

April 5th 2023

DIGSEA @ Careers Day,
Faculty of Maritime Studies,
Rijeka

The University of Rijeka, Faculty of Maritime Studies, organized a Careers Day on April 5, 2023. The Career Day of the Faculty of Maritime Studies has been successfully held at our Faculty for the tenth year. At the Careers Day, Faculty have had a presentation of the activities implemented so far as well as the expected results of the project DIGSEA for 35 participants from different institutions as well as numerous students.

SAVE THE DATE! DIGSEA FINAL EVENT

DIGSEA partners are glad to invite you to our final conference:

**Decarbonisation and digitalization of ports and freight transport.
The contribution of EU territorial cooperation**

**SAVE THE DATE!
June 21st, 2023**

Conference will be organized in Trieste on June 21st, 2023. The registration will be open soon! Follow our webpage and social media for more information.
