

Hadriaticum DATA HUB. Data management, protocols harmonization, preparations of guidelines: cross-border tools for maritime spatial planning decision-makers

D2.2.3 Press release 3 Report

30th June 2023

The third press release was prepared by the Blue World Institute (PP4) to report on the final conference of the project that was held in Split on the 23rd June 2023. This press release presented in short the project HATCH and the topics of the final conference: MSP in general and presentations of how HATCH contributed to it as well as presentations by other Interreg Italy-Croatia projects during the conference.

The press release was sent to media outlets in Croatia along with invitation to the Press conference which was organized by University Department of Marine Studies (PP5) in Split on the 21st June 2023. As media from Italy were not expected to participate in the Press conference, an extended version of the third Press release was prepared in Italian language, in collaboration with University of Udine (LP) and sent to Italian media.

The following web-portals in Croatia and Italy published the news on their websites:
